I. INTRODUCCIÓN	. 1
II. OBJETIVO Y ALCANCE DEL TRABAJO	.2
III. OPINIÓN	.3

## I. INTRODUCCIÓN

La Intervención General de la Administración del Estado, a través de la Oficina Nacional de Auditoria, en uso de las competencias que le atribuye el artículo 168 de la Ley 47/2003, de 26 de noviembre, General Presupuestaria, ha realizado el presente informe de auditoría de cuentas consolidadas del Instituto de Crédito Oficial (ICO).

Las cuentas anuales consolidadas del Instituto de Crédito Oficial y sus sociedades dependientes correspondientes al ejercicio 2011 fueron formuladas por su Presidente el 31 de marzo de 2012 y puestas a disposición de esta Oficina Nacional de Auditoría el 23 de abril de 2012.

El trabajo de auditoría se ha realizado por la empresa Ernst & Young, S.L, en el marco del contrato suscrito entre el Ministerio de Economía y Hacienda y dicha empresa a propuesta de la Intervención General de la Administración del Estado (IGAE). Dicho trabajo ha sido objeto de una revisión selectiva por funcionarios de la Oficina Nacional de Auditoría en los términos establecidos en el pliego de prescripciones técnicas que rige el mencionado contrato.

El presente informe recoge la opinión de los auditores de la Intervención General de la Administración del Estado y ha sido realizado de acuerdo con las Normas de Auditoría del Sector Público.

#### II. OBJETIVO Y ALCANCE DEL TRABAJO

El objetivo de nuestro trabajo es comprobar si las cuentas anuales consolidadas examinadas presentan en todos los aspectos significativos la imagen fiel del patrimonio consolidado, de la situación financiera consolidada, de los resultados consolidados, de los cambios del patrimonio neto consolidado y de los flujos de efectivo consolidados del Instituto de Crédito Oficial y de sus sociedades dependientes de acuerdo con las normas y principios contables que son de aplicación y contienen la información necesaria para su interpretación y comprensión adecuada. Asimismo, el trabajo ha comprendido la revisión de que la información contable incluida en el informe de gestión consolidado concuerda con la contenida en las cuentas anuales consolidadas y se ha elaborado de acuerdo con su normativa reguladora.

El examen comprende el balance de situación consolidado a 31 de diciembre de 2011, la cuenta de pérdidas y ganancias consolidada, el estado de cambios en el patrimonio neto consolidado, el estado de flujos de efectivo consolidado y la memoria de las cuentas anuales consolidadas correspondientes al ejercicio anual terminado en dicha fecha.

De acuerdo con la legislación vigente se presentan a efectos comparativos, con cada una de las partidas del balance de situación consolidado, de la cuenta de pérdidas y ganancias consolidada, del estado de cambios en el patrimonio neto consolidado, del estado de flujos de efectivo consolidado, y de la memoria de cuentas anuales consolidadas, además de las cifras del ejercicio 2011, las correspondientes al ejercicio anterior. Nuestra opinión se refiere exclusivamente a las cuentas anuales consolidadas del ejercicio 2011. Con fecha 20 de abril de 2011 esta Oficina Nacional de Auditoría emitió un informe de auditoría de las cuentas anuales consolidadas del ejercicio 2010, en el que se expresó una opinión favorable.

La información relativa a las cuentas anuales a que se refiere este informe de auditoría queda contenida en el fichero GB0721\_2011\_F\_120423\_170905\_Cuenta.zip cuyo resumen electrónico es 3318CDECD82E76583BF2182587DAED4B y que está depositado en la aplicación CICEP.red de la Intervención General de la Administración del Estado.

La autenticidad de este documento puede ser comprobada mediante el código electrónico: HSSNIML3GRRXDSL1 en www.pap.meh.es

En el desarrollo de nuestro trabajo no ha existido ninguna limitación en la aplicación de las normas y procedimientos de auditoría.

### III. <u>OPINIÓN</u>

En nuestra opinión, las cuentas anuales consolidadas del Instituto de Crédito Oficial y sus sociedades dependientes correspondientes al ejercicio 2011 representan, en todos los aspectos significativos, la imagen fiel del patrimonio consolidado, de la situación financiera consolidada, de los resultados consolidados de sus operaciones, de los cambios en el patrimonio neto consolidado y de sus flujos de efectivo consolidados y contienen la información necesaria para su interpretación y comprensión adecuada, de conformidad con las normas internacionales de información financiera adoptadas por la Unión Europea, que guardan uniformidad con las aplicadas en la preparación de las cifras correspondientes al ejercicio anterior presentadas a efectos comparativos.

#### Concordancia del informe de Gestión Consolidado

De acuerdo con la normativa reguladora la Entidad elabora, junto con las cuentas anuales consolidadas, un Informe de Gestión consolidado. El informe de gestión, consolidado adjunto contiene las explicaciones que el Presidente de la Entidad dominante considera oportunas sobre la situación del Grupo, la evolución de sus negocios y sobre otros asuntos, y no forma parte integrante de las citadas cuentas anuales consolidadas.

Nuestro trabajo se ha limitado a verificar que el mismo se ha elaborado de acuerdo con su normativa reguladora y que la información contable que contienen concuerda con la de las cuentas anuales consolidadas auditadas.

El presente informe de auditoría ha sido firmado electrónicamente a través de la aplicación Cicep.red de la Intervención General de la Administración del Estado por Don Ángel Manuel Álvarez Capón, Jefe de División de la Oficina Nacional de Auditoría, y por Don Gorka López González, Auditor Nacional, en Madrid a 27 de abril de 2012.

## INSTITUTO DE CRÉDITO OFICIAL

Notes to the consolidated financial statements for the year ended 31 December 2011

#### 1. Introduction, basis of presentation and other information

#### 1.1 Introduction

The Instituto de Crédito Oficial (hereinafter the Institute or ICO) was created by Law 13/1971 (19 June) on Official Credit Organisation and System was regulated, up until the publication of Royal Decree Law 12/1995 (28 December) on Urgent Budget, Tax and Financial Measures, by the provisions of Article 127 of Law 33/1987 (30 December) on the General State Budgets for 1988 and some provisions of Law 13/1971 that were not repealed.

The Institute is domiciled at Paseo del Prado, 4, in Madrid, where it carries out all of its activities and it does not have any office network.

The Institute is a public business entity in accordance with the provisions of Article 43.1.b) of Law 6/1997 (14 April), on the Organisation and Operation of the General State Administration and pertains to the Ministry of Finance through the Secretary of State for Finance; it is a credit institution by law and is considered to be a State Finance Agency with its own legal personality, assets and finances, as well as management autonomy to fulfil its purposes.

The Secretary of State for Finance is responsible for the strategic management of the Institute, as well as for the evaluation and control of the results of its activities.

The Institute is governed by the provisions of Law 6/1997 (14 April) on the Organisation and Operation of the General State Administration, through Additional Provision Six of Royal Decree-Law 12/1995 (28 December), on Urgent Budget, Tax and Financial Measures, by applicable provisions of the General Budget Act approved by Legislative Royal Decree 1091/1998 (23 September), by its bylaws, approved by Royal Decree 706/1999 (30 April), on the adaptation of Instituto de Crédito Oficial to Law 6/1997 (14 April) and the approval of its bylaws (Official State Gazette 114 published on 13 May 1999), and any matters not covered by the above are governed by the special legislation applicable to credit institutions and general civil, mercantile and employment legislation.

The Institute's purpose is to sustain and promote economic activities that contribute to growth and the improvement of national wealth distribution and, in particular, all those that are deserving of support due to their social, cultural, innovative or ecological importance.

When pursuing these aims, the Institute must completely respect the principles of financial balance and the adaptation of means to purposes.

The Institute also has the following duties:

- a) Contribute to the mitigation of the economic effects deriving from serious economic recessions, natural catastrophes or similar situations, in accordance with the instructions received in this respect from the Council of Ministers or the Government Commission for Economic Matters.
- b) Act as the instrument for executing certain economic policy measures, in line with the fundamental guidelines established by the Council of Ministers or the Government Commission for Economic Matters, or the Ministry of Finance, subject to the rules and decisions adopted by its General Council.

Within the framework of these purposes and duties, the following types of operations are included:

- Direct credit and mediation activities, providing financial support to certain sectors and strategic activities, such as small businesses, housing construction, telecommunications, internationalisation of Spanish businesses, etc., and the operations transferred by the former official banks now forming part of Banco de Bilbao Vizcaya Argentaria, S.A. (hereinafter BBVA), by virtue of the Resolution adopted by the Council of Ministers (hereinafter RCM) on 15 January 1993.
- 2. Reciprocal Interest Adjustment Agreement (hereinafter RIAA). This export support system ensures a yield for the member financial institution, domestic or foreign. The Institute merely acts as an intermediary in the transaction, charging the State for its management costs, in accordance with the provisions of the General State Budget Act for each year.

The net result of interest adjustments with member banks is regularly offset by the State or a payment is made by the Institute to the State, depending on which party is the debtor or creditor, respectively.

- 3. Development promotion fund (FONDPRODE for its initials in Spanish). This Fund was established in 2010 under Act 36/2010. It is designed to finance development projects and programmes in less developed countries in the form of State-to-State grants. The Institute acts as a Government agent and the structuring, administration and accounting for these transactions is kept separate from all other operations, in independent accounts maintained by the Institute and the ICO is reimbursed for the cost of management in accordance with the General State Budget for each year.
- 4. Corporate internationalisation fund (FIEM for its initials in Spanish). This Fund was established in 2010 under Act 11/2010. Its activity consists of providing reimbursable financing of projects, under concessions or market terms, tied to the acquisition of Spanish goods and services and to the execution of Spanish investment projects or those of national interest. The Institute acts as a Government agent and the structuring, administration and accounting for these transactions is kept separate from all other operations, in independent accounts maintained by the Institute and the ICO is reimbursed for the cost of management in accordance with the General State Budget for each year.
- 5. Fund for granting microloans for social development projects abroad, created in accordance with Article 105 of Law 50/1998 (30 December) on Administrative and Social Order Tax Measures, as a financial instrument through which the Government may attain the funds necessary to grant loans to improve the living conditions of vulnerable populations and the execution of basic social development projects. As is the case with DAF, the Institute acts as a government agent, administrating and accounting for these operations separately from the rest of its activities.
- 6. Water and Sanitation Cooperation Fund. It was created through the Sixty-First Additional Provision of Law 51/2007, December 26th, of the 2008 General State Budget to fund water and sanitation projects under the financing arrangements with the national authorities of the Latin America Countries, priority for the Spanish cooperation.

The last five types of operations are not included in the accounts kept by the Institute. In this connection, Article 41.3 of Law 46/1985 states as follows: "The structuring and administration of operations charged to the institute will be the responsibility of the Institute and the accounts will be kept separate from the rest of its operations". Additional Provision Fourteen of Law 47/2003 stipulates: "In any event, these funds will be accounted for separate from the accounts relating to the State".

#### **1.2** Basis of presentation of the consolidated financial statements

Since January 1st 2005, the Group presents its consolidated financial statements in accordance with International Financial Reporting Standards adopted by the European Union (hereafter, NIIF-UE) mandatory for those entities that at the time of final balance sheet situation, their values where admitted to trading on a regulated market in any Member State, as established by Regulation 1606/2002 of July 19, European Parliament and Council. Similarly, the consolidated financial statements are presented according to the principles and standards contained in Circular 4/2004 of December 22 (hereafter, Circular 4/2004), Bank of Spain, on financial reporting standards and public reserved models on financial statements. The aforesaid Circular 4/2004 is mandatory for the individual financial statements of the Spanish Credit Institutions.

As established above the Circular 4/2004, this Circular, by their very nature, serves with both the International Financial Reporting Standards and with the Spanish accounting framework, and will be adapted as the framework evolves over time.

Accordingly, the accompanying consolidated financial statements have been prepared from the accounting records of the entities Group and in accordance with the requirements established by International Accounting Standards (IAS) adopted by the European Union (NIIF-UE) and by Circular 4/2004 of December 22, Bank of Spain, partially modified by Circular 6/2008, November 26, Bank of Spain and with the Commercial Code, the Ley de Sociedades Anónimas or other Spanish legislation that is applicable, so that they present fairly the net worth and financial situation of the Group at 31 December 2011 and the results of its operations, of changes in equity and consolidated cash flows for the year ended on that date.

The accounting principles applied in the preparation of the consolidated financial statements for the year ended 31 December 2011 are the same as those applied to the 2010 consolidated financial statements, except for the following standards and interpretations, applicable for annual periods beginning on or after 1 January 2011:

- IAS 32 "Classification of Rights Issues"
- IAS 24 "Related Party Disclosures"
- IFRIC 19 "Extinguishing Financial Liabilities with Equity Instruments"
- IFRIC 14 "Prepayments of a Minimum Funding Requirement: "
- Improvements to IFRS (may 2010).

The adoption of these amendments and interpretations did not have a significant effect on the consolidated financial statements.

The Group has not early adopted any standard, interpretation or amendment issued but not effective.

The Group is assessing the impact that the following non-mandatory standards issued by the IASB and endorsed by the European Union might have on its accounting policies, financial position, or results:

 Amendment to IFRS 7 "Disclosures about Transfers of Assets": effective for annual periods beginning on or after 1 July 2011. At the date of publication of these consolidated financial statements, the following IFRSs and amendments had been issued by the IASB but were not mandatory and had not been approved by the EU:

- Amendment to IAS 12 "Deferred Tax Recovery of Underlying Assets": effective for annual periods beginning on or after 1 January 2012.
- Amendments to IAS 1 "Presentation of Comprehensive Income": effective for annual periods beginning on or after 1 July 2012.
- IFRS 9 "Financial Instruments" and amendments to IFRS 9 and IFRS 7 "Mandatory Effective Date and Transition Disclosures": effective for annual periods beginning on or after 1 January 2015.
- IFRS 10 "Consolidated Financial Statements": effective for annual periods beginning on or after 1 January 2013.
- IFRS 11 "Joint Arrangements": effective for annual periods beginning on or after 1 January 2013.
- IFRS 12 "Disclosures of Interests in Other Entities": effective for annual periods beginning on or after 1 January 2013.
- IFRS 13 "Fair Value Measurement": effective for annual periods beginning on or after 1 January 2013.
- Amended IAS 19 "Employee Benefits": effective for annual periods beginning on or after 1 January 2013.
- IAS 27 amended "Separate Financial Statements": effective for annual periods beginning on or after 1 January 2013.
- IAS 28 (revised) "Investments in Associates": effective for annual periods beginning on or after 1 January 2013.
- IFRIC 20 "Stripping Costs in the Production Phase of a Surface Mine": effective for annual periods beginning on or after 1 January 2013.
- Amendments to IAS 32 "Offsetting Financial Assets and Financial Liabilities": effective for annual periods beginning on or after 1 January 2014.
- Amendments to IFRS 7 "Disclosures Offsetting of Financial Assets and Financial Liabilities": effective for annual periods beginning on or after 1 January 2013.

The Group estimates that adoption of these standards and amendments will not have a significant impact on the consolidated financial statements in the initial period of application.

All obligatory accounting principles and measurement bases with a significant effect have been applied in the preparation of these financial statements. Note 2 provides a summary of the main accounting policies and measurement bases used in the accompanying consolidated financial statements. The directors of the Group's parent company are responsible for the information contained in these consolidated financial statements.

The consolidated financial statements for the year 2011 of the Group have been prepared by the Chairman of the Institute dated on March the 31, 2012, still pending approval by the General Council of the Institute, parent entity of the Group, which is expected to approve them without significant changes. These consolidated financial statements, unless otherwise stated, are presented in thousand of euros.

#### **1.3** Responsibility for information and estimates made.

The information contained in Group's consolidated financial statements for the year ended 31 December 2011 and the accompanying Notes to the Consolidated financial statements are the responsibility of the Chairman. When preparing these consolidated financial statements, at times estimates made by Group has been used to quantify some of the assets, liabilities, income, expenses, and commitments. These estimates relate basically to:

- Impairment losses on certain assets
- Assumptions used in actuarial calculations of liabilities and commitments relating to postemployment benefits and other long-term commitments with employees.
- Useful lives of fixed assets and intangible assets.
- Losses on future obligations deriving from contingent risks.
- The fair value of certain unlisted assets.

These estimates were made based on the best information available at 31 December 2011 in connection with the facts analyses. Nonetheless, future events could generate significant adjustments (upward or downward) in coming years, which would be made prospectively, to recognize the impact of the change in the estimate on the consolidated income statement for the years in question.

#### 1.4 Transfer of assets and liabilities from the former Argentaria

The former entities Argentaria, Caja Postal and Banco Hipotecario, S.A., were the result of the merger between Corporación Bancaria de España, S.A., Banco Exterior de España, S.A. (BEX), Caja Postal, S.A. and Banco Hipotecario de España, S.A. (BHE), in accordance with the public merger document dated 30 September 1998. Banco de Crédito Agrícola, S.A. (BCA), was previously taken over by Caja Postal, S.A. and Banco de Crédito Local de España, S.A. (BCL), which al so pertained to the first entity, maintains its legal personality.

In reference to the provisions of the RCM dated 15 January 1993, on 31 December 1992 the Institute acquired the assets and liabilities pertaining to BCL, BHE, BCA and BEX deriving from economic policy operations that were guaranteed by the State or the Institute and, specifically, the loans and guarantees provided to companies in conversion (covered by legislation regarding conversion and re-industrialization), exceptional loans granted to victims of floods, the loans granted by these entities prior to their transformation into public limited liability companies, as well as other assets, rights and equity investments.

Furthermore, on 25 March 1993 a management agreement was concluded with the relevant banks regarding the transferred assets and liabilities, which includes both the administration and the adequate accounting for these items in accordance with current banking legislation. The management commissions accrued in 2011 and 2010 totalled 453 thousand euros and 799 thousand euros, respectively.

At 31 December 2011 and 2010 the breakdown by nature of the transferred assets and liabilities that were managed at those dates by BBVA (the entity resulting from the integration of all of the above, among others), is set out below:

	Thousands of			
Assets and liabilities managed by BBVA	2011	2010		
Credit Institutions	9	9		
Loans to Spanish Public Administrations	580	712		
Loans to other resident sectors	139	318		
Doubtful assets	3,750	5,416		
Non-current assets	120	100		
Sundry accounts	7	7		
Total assets	4,605	6,562		
Sundry accounts	293	389		
Connection account with ICO	4,102	4,844		
Profit for year	210	1,329		
Total liabilities	4,605	6,562		

#### 1.5 Presentation of individual financial statements

In accordance with Article 42 of the Code of Commerce, the Institute has prepared its individual financial statements at the same date as the present consolidated financial statements.

A summary is set out below of the individual balance sheet, individual income statement, individual statement of changes in equity and individual cash flow statement of Instituto de Crédito Oficial for the years ended 31 December 2011 and 2010, prepared under the same accounting principles and standards as applied by the Group in consolidated financial statements:

a) Individual balance sheets at 31 December 2011 and 2010:

	Thousand of euros		
	2011	2010	
Cash and balances with central banks	31,121	424,055	
Financial assets held for trading	451,799	598,423	
Available-for-sale financial assets	1,026,712	1,261,385	
Loan and receivables	80,124,223	66,159,489	
Held-to-maturity investment portfolio	7,412,672	4,292,179	
Hedging derivatives	5,206,759	4 ,768,558	
Non-current assets for sale	2,151	1,592	
Shareholdings	43,199	69,394	
Tangible assets	100,190	103,240	
Intangible assets	10,694	14,442	
Tax assets	166,096	164,660	
Other assets	1,334	2,603	
Total assets	94,576,950	77,860,020	
Financial liabilities held for trading	442,959	552,616	
Financial liabilities at amortised cost	89,252,076	72 199 138	
Hedging derivatives	670,691	1,400,175	
Provisions	414,015	375,774	
Tax liabilities	107,245	99,190	
Other liabilities	4,446	2,938	
Total liabilities	90,891,432	74,629,831	
Valuation adjustments	205,632	139,718	
Own Funds:	3,479,886	3,090,471	
Capital or endowment fund	2,700,837	2,351,448	
Reserves	739,023	707,775	
Profit and loss for the period	40,026	31,248	
Total equity	3,685,518	3,230,189	
Total equity and liabilities	94,576,950	77,860,020	
Contingent risks	2 501 150	2 960 257	
Contingent risks Contingent commitments	2,501,159 16,498,696	2,869,357 17,037,648	
Contragon communente		<u> </u>

#### **1.6** Environmental impact

The Group's global transactions are governed by the laws on environmental protection. The Institute deems that the Group substantially complies with these Laws and that the procedures it uses are designed to encourage and ensure compliance with said Laws.

The Institute considers that the Group has taken appropriate environmental protection and improvement measures and for minimizing, whenever applicable, the environmental impact, and complies with rules enforced in this regard. In 2011 and 2010 the Group has not carried out significant environmental investments and neither has it considered it necessary to record any provision for environmental risks and charges. Nor does it consider that there are any significant contingencies in connection with environmental protection and improvement.

#### 1.7 Minimum coefficients

#### 1.7.1 Minimum equity ratio

The Bank of Spain, dated May 22, 2008, has issued Circular 3/2008 on identification and control of the minimum equity. The aforesaid Circular is the final development in the field of credit institutions, on the legislation on its equity and supervision on a consolidated basis of the financial institutions issued from Law 36/2007 of November 16, which amends Act 13/1985, of May 25, of the investment ratio, equity and information obligations of financial intermediaries and other financial system and that includes the Royal Decree 216/2008, of February 15 of financial institutions to EU directives 2006/48/EC of the European Parliament and the Council of 14 June 2006 concerning the business of credit institutions (recast) and 2006/49/EC of the European Parliament and the Council of 14 June 2006 on capital adequacy of investment services companies and credit institutions (recast). The two Directives have been deeply revised, following the equivalent Agreement adopted by the Basel Committee on Banking Supervision (known as Basel II), the minimum capital requirements due to credit institutions and their consolidated groups.

Directive 2009/111/EC of the European Parliament and of the Council, of 16 September, amends directives as regards banks affiliated to central institutions, certain own fund items, large exposures, supervisory arrangements, and crisis management, and amends certain technical criteria set out in the Annexes of Directive 2006/48/EC. Similarly, Directive 2010/76/EU of the European Parliament and of the Council, of 24 November, contains additional amendments to directives as regards capital requirements for the trading book and for re-securitisations, and the supervisory review of remuneration policies.

Act 2/2011, of 4 March, on the Sustainable Economy and, fundamentally, Act 6/2011, of 11 April, amending Act 13/1985, mark the first stage of implementing these two directives in Spanish legislation. Nevertheless, given the complexity and detail of these directives, above all with respect to solvency, these laws and Royal Decree empowered the Bank of Spain to transpose many of their technical aspects.

Accordingly, the main purpose of Circular 4/2011, of 30 November, was to complete the transposition into Spanish law of these directives (known in the market as CRD2 and CRD3). Moreover, Circular 4/2011 marked progress in adapting Spanish prudential regulations to the new criteria established by the Basel Committee on Banking Supervision in what is known as Basel III; i.e. the new prudential framework for solvency and liquidity initiated at the end of 2009 following the two documents issued by this Committee with the overriding aim of ensuring the future computability of equity instruments issued from 2012.

At December 31, 2011 and 2010, the entity's computable equity, which is calculated in a consolidated basis, exceeds the minimum requirements required by the regulation cited in 1,299,354 thousand euros and 1,047,077 thousand euros respectively.

Also, Circular 3/2008 stipulates that net tangible assets and all consolidated groups of credit institutions risks with the same person or economic group, may not exceed certain percentages of equity, also establishing limits on positions in foreign currencies. At December 31, 2011 and 2010, the Entity Group complies with these limits.

At December 31, 2011 and 2010, the ICO Group's computable equity is as follows:

	Thousand o	f euros
	2011	2010
Basic own funds	3,407,256	3,021,825
- Capital	2,700,837	2,351,448
- Reserves (*)	706,419	670,377
Second category own funds	294,913	292,550
- Other reserves (*)	42,966	40,603
- Generic insolvency risk coverage	251,947	251,947
Total computable own funds	3,702,169	3,314,375
Total minimum own funds	2,402,815	2,267,298

(\*) The total reserves used for the calculation of own resources of the group computable differ from those recorded in the consolidated balance sheet because in the calculation of own funs is given:

- The deduction of basic own funds for intangible assets
- Corrections to valuation adjustments on financial assets available for sale

At December 31, 2011 and 2010, the most important data of the minimal resources of the Group are (in thousand euros):

	2011	2010
Basic own funds Risk weighted	3,407,256 30,035,188	3,021,825 26,763,749
Basic own funds ratio (%)	11.34%	11,29%
Computable equity	3,702,169	3,314,375
Computable equity ratio (%)	12.33%	12,38%
Minimum computable equity ratio (%)	9.5%	9.5%

(\*) ICO's minimum computable own funds is 9.5% according to Additional Provision Forty-nine, point II, of State Budget Act 42/2006, of 28 December, of the 2007 General State Budget.

At December 31, 2011 and 2010 ICO Group's computable own funds exceeded the minimum requirements by the mentioned standards.

#### 1.7.2 Minimum reserves ratio

The Institute must maintain a minimum level of funds deposited in a central bank of a euro country to cover the minimum reserve requirements. At 31 December 2011, this level was 2% of computable liabilities. On 24 November 2011, Regulation (EU) No 1358/2011 came into effect, requiring 1% for additional computable liabilities (time deposits of over two years drawable subject to a notice period of more than two years, sales under repurchase agreements and securities other than shares with maturities of over two years). This amendment will be applied following the maintenance period commencing on 18 January 2012.

At December 2011 and 2010, and throughout 2011 and 2010, Group complied with the minimum ratios required by applicable Spanish regulations.

#### 1.7.3 Capital management

The Institute considers capital management, first and second category computable equity regulated by the solvency legislation (Circular 3/2008 Bank of Spain, from May 22, 2008 on the identification and control of minimum equity).

In this sense, the regulatory capital requirements are incorporated directly in the management thereof in order to maintain at all times a solvency ratio higher than 9.5%. This objective is met through a proper capital planning.

#### 1.8 Post-balance sheet events

In accordance with Additional Provision of Law 24/2001, of 27 December 2001, on Tax, Administrative and Social Security measures, amended by Law 42/2006, of State Budget for 2007, the amounts recovered following the repayment by Central Government of the debts incurred with ICO as a result of certain credit and guarantee facilities granted by the former Entidades Oficiales de Crédito and the Institute itself will form part of the Institute's equity. The amount estimated for 2011 totals 9,5 million euros, that will be recognized in 2012.

As in previous years, chapter VIII of the General State Budgets for 2011 envisages a new contribution to ICO's equity amounting to 520 million euros in order to increase the equity of the Institute and adapt it to its activities

In 2012, the Instituto de Crédito Oficial, as a State Financial Agency, has capitalized by government order, new lines of credit to businesses and individuals in order to provide more liquidity to the Spanish credit system and to address other needs within the framework of the Institute objectives. The main lines approved are:

- Línea ICO Inversión 2012: this ICO line provides preferential supports and funding for the development of investment projects of freelancers and small and medium-sized Spanish companies. It is intended for self-employed persons and small and medium enterprises, financing 100% of the investment project and with support for the aid received from the Autonomous Regions and other institutions.
- Línea ICO Internalización 2012: this ICO line provides finance of up to 10 million euros for productive investments, investments in interests in foreign companies and overseas start-ups.
- Línea ICO Desarrollo Empresarial 2012: this line, which will be new in 2012, provides finance to companies in two different stages of the growth cycle, with one tranche for start-ups and a "capitalsation" tranche to help companies expand and grow through equity acquisitions. These transactions have a 1 million euro limit.
- Línea ICO Liquidez 2012: is for self-employed persons, and small and medium-sized companies, with a maximum funding limit of 500 thousand euros per customer per year, in one or more transactions. The part funded by credit institutions will be analyzed by them and the guarantees that must be provided will be based on the applicant's creditworthiness.
- Línea ICO Vivienda 2012: line aims, among other things, to promote rental housing. ICO may conclude transactions with a credit institution other than the one that initially granted the loan to the developer.

The total amount of the lines amounts to 19,000 million euros. In late December 2011, the ICO and credit institutions that submitted the application for membership of these credit lines firm handled the drafting and funding of contracts.

In February 2012, the Government's Economic Affairs Committee approved the commencement of an ICO direct financing line for regional governments under the new budget stability legislation. This line has an initial allocation of 10,000 million euros (which may be increased to 15,000 million euros subject to a resolution by the Committee). The purpose is to provide finance at market rates to regional governments that meet fiscal discipline targets. The line comprises two tranches. The first (refinancing tranche) provides the regional governments with funds to meet outstanding payment obligations on financial debt arranged prior to 1 January 2012 and falling due by 30 June 2012. The second tranche (suppliers tranche) provides the regional governments with liquidity to meet their outstanding payments with suppliers from purchases of supplies, works or services. Only obligations that have been previously recognised as a deficit of these regional governments are eligible to be financed.

On 4 February 2012, Royal-Decree Law 2/2012, of 3 February, to strengthen the financial sector, was enacted. This law set out an array of measures aimed at cleaning up credit institutions' balance sheets, which after years of global economic crisis had been seriously affected by the scale of exposure to property assets and the sharp increase in doubtful loans.

This law contains new provisioning and additional capital requirements designed to cover impairments of property assets. It lays out a coverage scheme for all loans and foreclosed assets, or assets receive in settlement of debt, related to this industry. The adjustments deriving from this law must be made in 2012. Financial institutions have until 31 March 2012 to provide the Bank of Spain with an adjustment strategy designed to make the necessary balance-sheet restructuring. Exceptionally, a further 12 months will be given to institutions that merge in 2012.

This Royal Decree-Law also introduces other measures aimed at strengthening, and enhancing the transparency of, the financial sector; e.g. adaptation of the organisational structures and operating requirements of savings banks (Cajas de Ahorros); establishment of a remuneration framework for director and executives of credit institutions that have required, or may require in future, institutional support; introduction of special treatment for preference shares or mandatorily convertible debt instruments issued before the law came into force.

Under the Sixth Final Provision of this Royal Decree-Law, the Bank of Spain approved Circular 2/2012, of 29 February, to adapt Circular 4/2004 to the new regulations.

The Institute, along with the rest of the entities that make up Spain's financial system, has been affected by the global financial crisis and the economic crisis in Spain. To overcome this situation, the Institute made the estimates necessary to determine the impairment losses identified on its assets in 2011. In addition, recent regulations require new provisions which, based on the preliminary estimates, could amount to around 116 million euros.

Royal Decree-Law 2/2012, of 3 February, also states that consolidable groups of credit institutions and entities not belonging to a consolidable group subject to a minimum principal capital requirement must show an additional surplus based on their exposure to certain assets, calculated based on the percentages of impairment stated in this Royal Decree-Law. ICO estimates a additional principal capital requirement in this connection of approximately 10 million euros. On 30 March 2012, ICO sent the Bank of Spain the report stipulated in article 1.4 of Royal-Decree Law 2/2012.

On 17 January 2012, rating agency Standard & Poor's downgraded Instituto de Crédito Oficial's rating to "A". Meanwhile, on 1 February 2012, Fitch cut its rating to "A", negative outlook, after downgrading Spain's sovereign rating. Furthermore, on 16 February 2012, Moody's lowered its rating for Instituto de Crédito Oficial (ICO) to "A3" after downgrading Spain's rating to the same level on 14 February.

No significant events other than those described in the above paragraphs have occurred from the end of the reporting period (31 December 2011) to the date these financial statements were issued (31 March 2012).

#### 1.9 Information per business segment

The Group's principal activity is the granting of lines of credit and direct loans and therefore, in accordance with relevant legislation, it is considered that the information relating to the segmentation of operations into different lines of business at the Group is not relevant.

In addition, the Group develops its activity both inside and outside the Spanish territory. All operations are granted to fund Spanish interest.

#### 1.10 ICO direct lending activities

In June 2010, ICO launched a new business segment known as "ICO Direct," designed to provide financing to self-employed individuals, SMEs, and non-profit entities residing in Spain which have been operating for more than one year and are looking to make new investments in machinery, furniture, IT equipment and buildings This business segment complements the ICO's normal lending activities conducted through mediation lines with financial institutions and represents a broadening of the finance channels aimed at SMEs and self-employed individuals. The ICO Direct line was renewed for 2012.

These lending transactions are processed directly by the ICO at the following website: <u>www.facilitadorfinanciero.es</u>. Detailed information on this product is provided on the aforementioned website and at our commercial website <u>www.icodirecto.es</u>. Transactions derived from ICO Direct activities are formally processed and administered by Banco Santander and Banco Bilbao Vizcaya Argentaria (BBVA). These financial institutions were awarded the public tender held by ICO for this purpose.

The breakdown by nature of ICO Direct's assets and liabilities at 31 December 2011 and the corresponding managing entity is as follows:

	Thousands of euros							
	2011		2010					
Assets and liabilities of ICO Direct	BBVA	BS	BBVA	BS				
Loans and advances to other resident sectors Doubtful assets	199,731	262,902	80,675	97,677				
Other		(7)		13				
Total assets	199,731	262,895	80,675	97,690				
Sundry accounts	-	1	-	1				
Connection account with ICO	209,874	265,249	79,633	96,447				
Profit for the year	(10,143)	(2,355)	1,042	1,242				
Total liabilities	199,731	262,895	80,675	97,690				

#### 1.11 ICO local corporation lending activity in 2011

The ICO-Local Corporation Facility was started pursuant to the Royal Decree-Law designed to foster the stability of public accounts and social protection approved in July 2011 by the Spanish cabinet. Its aim was to alleviate the problems of many self-employed professionals and small businesses that, in light of the struggling economy, were suffering from major problems settling their collection rights on supplies, works and services rendered to local bodies.

This facility is designed to provide local corporations (local and municipal governments) with liquidity to settle their outstanding invoices to 30 April 2011. It was mostly designed to help them repay debts with self-employed individuals and SMEs based on the age of certifications or documents.

To process the loans and repay suppliers faster, the entire application process was available on-line through ICO's commercial web (www.icodirecto.es ). For this, ICO designed a programme enabling local corporations to input the documentation required and receive prompt information on any documents lacking or potential deficiencies in the data introduced. ICO also oversaw processing of the direct payment of 222,975 approved supplier invoices.

The ICO-Local Corporation Facility was in operation from July 2011 to 30 November 2011. During this time, the facility enabled 1,029 local, regional and inter-island town councils throughout Spain to settle 222,975 outstanding invoices for supplies, works and services provided by 38,338 self-employed individuals and SMEs for a total of 967 million euros.

#### 2. ACCOUNTING PRINCIPLES AND POLICIES AND MEASUREMENT METHODS APPLIED.

During the preparation of Group's consolidated financial statements for the years ended 31 December 2011 and 31 December 2010, the following accounting principles and policies and measurement methods have been applied:

#### a) Going concern principle

The financial statements were prepared on the assumption that the Institute will continue to operate in the future. Accordingly, the application of accounting policies is not designed to determine net asset value for the total or partial transfer of its assets or that which would result from liquidation.

#### b) Accruals principle

Except with respect to the cash flow statement, these financial statements have been prepared on an accrual basis, that is, transactions have been recognised at the date the actual goods or services represented by them take place, regardless of when actual payment or collection occurs.

#### c) Other general principles.

The financial statements have been prepared on a historical cost basis, except for the revaluation of land and structures (only to 1 January 2004) (Note 14), available-for-sale financial assets and financial liabilities (including derivatives) at fair value through profit or loss.

#### 2.1 Shareholdings

#### 2.1.1 Subsidiaries

"Subsidiaries" are those in which the Institute has the capacity to exercise control. This is generally, though not exclusively, reflected by the direct or indirect ownership of at least 50% of the voting rights or, if lower, or where no voting rights are held, by other circumstances or agreements with shareholders that give control to the Parent entity. In accordance with the new regulations, control is deemed to be the power to direct an entity's financial and operational policies in order to benefit from its activities.

The subsidiaries' financial statements are consolidated with those of the Entity using the full consolidation method, as stipulated in prevailing regulations. Consequently, all significant balances deriving from transactions between the fully-consolidated companies have been eliminated during consolidation. The Institute, parent of the Group, which is 99% of it.

Additionally, third-party interests in the:

- Group's equity are presented in "Minority interests" in the consolidated balance sheet, and there is no balance at 31 December 2011 and 2010.
- Consolidated results for the year are presented in "Surplus attributed to minority interests" in the consolidated income statement, and there is no balance at 31 December 2011 and 2010.

Results generated by subsidiaries acquired by the Group during the year are consolidated taking into account only the amounts for the period running from the acquisition date to the year end.

Appendix I provides relevant information on these entities, all of which close their financial year on 31 December.

#### 2.1.2 Associates entities

These are entities over which the Institute holds significant influence, although they do not form part of a decision unit together with the Institute nor are they under joint control. Normally, significant influence generally accompanies a direct or indirect shareholding of 20% or more of the voting rights.

Shareholdings in "Associates entities" are presented in these financial statements under the heading "Shareholdings-Associates entities" in the balance sheets and are stated at acquisition costs, net of any impairment that they may have undergone.

The results on the transactions between the associate and Group companies are eliminated in the percentage represented by the Group's interest in the associate. The results recorded in the year by the associate, following the elimination referred to above, increase or decrease, as appropriate, the value of the relevant shareholding in the consolidated financial statements. The amount of these results is recorded under "Results in companies carried under the equity method" in the consolidated income statement (Note 28).

The variations in the valuation adjustments of the associate, subsequent to the acquisition date, are recorded as an increase or decrease in the value of the shareholding. The amount of these variations has been recorded under "Valuation adjustments", in consolidated equity.

Appendix I provides relevant information on these entities.

#### 2.2 Financial Instruments

#### 2.2.1 Initial recognition of financial instruments

Financial instruments are initially recognised in the balance sheet when the Group becomes party to the relevant contract, in accordance with the terms of that contract. Specifically, debt instruments such as loans and deposits in cash are recognised as from the date on which the legal right to receive or the legal obligation to pay the cash is generated, respectively. In general, financial derivatives are recognised on the date they are contracted.

Purchases and sales of financial assets arranged through conventional contracts, understood as those contracts under the parties' reciprocal obligations must be fulfilled with a timeframe established by regulations or market conventions and which may not be settled by differences, such as stock market contracts or currency forwards, are accounted for from the date on which the benefits, risks, rights and duties inherent in all ownership are transferred to the acquirer. Depending on the type of financial asset purchased or sold, this may be the date of contract or the date of settlement or delivery. Specifically, transactions effected in the foreign exchange spot market are recognised at the settlement date, transactions effected using equity instruments traded in Spanish securities markets are recognised at the settlement date.

#### 2.2.2 Disposal of financial instruments

Financial instruments disposals are recorded in the manner in which risks and benefits associated with the transferred financial instruments are transferred, based on the following criteria:

- If the risks and benefits are substantially transferred to third parties, as in unconditional sales, sales and repurchase at fair value at the date of the acquisition, sales of financial assets with a purchase option or sales gained issued deeply out of money, the securitization of assets in which the grantor retains no subordinate financing or grant any credit enhancement to the new owners, etc., the transferred financial instrument is removed off the balance sheet, recognizing both any right or obligation retained or created as a result of the transfer.
- If the risks and benefits associated with the transferred financial instrument are retained, such as sales of financial assets with repurchase agreements for a fixed price or the sale price plus interest, the loan contracts of values in which the borrower must return the same or similar assets, and so on., the transferred financial instrument is not removed off the balance sheet and continues being measured with the same criteria used before the transfer. However, the financial liability associated by an amount equal to the consideration received is recognized, which is then valued at amortized cost, the transferred financial asset incomes but not recognized and the new financial liability costs.
- If neither the risks and benefits associated with the transferred financial instrument are transferred nor retained substantially, such as sales of financial assets with a purchase option bought or sold that are neither inside nor outside money, securitizations in which grantor assumes a subordinated financing or other credit enhancements for a share of the assets transferred, and so on., is distinguished between:
- If the entity does not retain control over the transferred financial instrument, in which case it gives off the balance sheet and recognizes any right or obligation retained or created as a result of the transfer.
- If the entity retains control over the transferred financial instrument, in which case it continues recognizing it on the balance sheet at an amount equal to its exposure to value fluctuations that can experience and a financial liability associated to an amount equal to the consideration received is recognized. Such liabilities are subsequently valued at amortized cost, unless it meets the requirements to be classified as financial liabilities at fair value with changes in the income statement. To calculate the amount of this financial liabilities, the amount of its financial instruments (such as asset-backed securities and loans) which constitute funding for the entity to which financial assets have been transferred will be deducted, in the exact amount these financial instruments finance specifically the transferred assets. The net amount between the transferred assets and liabilities associated to them, will be the amortized cost, or fair value of the rights and obligations retained, if the transferred asset is measured by its fair value.

Therefore, financial assets are only removed from balance sheet when the cash flows generated have been extinguished or when the implicit risks and benefits have been transferred to third parties. Similarly, financial liabilities are only removed off the balance sheet when the obligations generated have been extinguished or when they are purchased with the intention to cancel or reposition them again.

#### 2.2.3 Fair value and amortised cost of financial instruments

#### Financial assets:

The fair value of a financial instrument at a given date is understood to be the amount at which it may be purchased or so Id at that date between duly informed parties in an arm's length transaction. The most objective and common reference value for a financial instrument's fair value is the price that would be paid in an organised, transparent and deep market ("quoted price" or "market price").

In the absence of a market price for a specific financial instrument, its fair value is estimated on the basis of recent transactions involving similar instruments or, failing this, using valuation techniques that are acceptable to the international financial community, taking into account the specific features of the instrument to be measured and, above all, the different types of associated risks.

Specifically, the fair value of held-for-trading derivative financial instruments traded in organised, transparent and deep markets is the same as their daily market price. If, in exceptional circumstances, the price cannot be established on a given date, they are measured using similar methods to those applied to derivatives not traded in organised markets.

The fair value of derivatives not traded in organised markets, or traded in organised markets that are not deep or transparent, is equal to the sum of the future cash flows generated by the instrument, discounted at the measurement date ("present value" or "theoretical close"), employing valuation techniques accepted by the financial markets: "Net Present Value" (NPV), option pricing models, etc.

Amortised cost is the acquisition cost of a financial asset or liability adjusted (upward or downward) for capital and interest repayments and, where applicable, for the (higher or lower) portion (recognised in the income statement applying the effective interest method) of the difference between the initial amount and the repayment value of the financial instruments. The amortised cost of financial assets also includes impairment adjustments.

The effective interest rate is the discount rate that brings the initial value of a financial instrument exactly into line with total estimated cash flows throughout its residual life. In the case of fixed-income financial instruments, the effective interest rate is equal to the contractual rate defined on acquisition, adjusted for commissions and transaction costs that, in accordance with the provisions of Bank of Spain Circular 4/2004 (22 December), must be included in the calculation of the effective interest ratio The effective interest rate for variable-rate financial instruments is estimated in the same way as for fixed-income transactions, and is recalculated at each interest review date stated in the contract, taking into consideration changes in the transaction's future cash flows.

Other entities shareholdings whose fair value cannot be determined objectively and financial derivatives that have these instruments like its underlying assets and are settled by delivery of them are kept at cost adjusted, where appropriate, for impairment losses they have experienced.

Variations in financial assets amounts are registered, in general, with counterpart in the profit and loss account, differentiating between those that are caused by the accrual of interest and similar items that are recorded in the heading of Interest and similar income, and those corresponding to other causes, which are recorded by the net amount under the heading of Gain or losses on financial assets and liabilities of the profit and loss account.

However, changes in instruments value included under the heading Available for sale financial assets are recorded temporarily in the epigraph Valuation adjustments in Net Equity unless they come from exchange differences. The amounts in the epigraph Valuation adjustments remain part of net equity until they are removed from balance sheet assets where they are originated, moment when they are written off against profit and loss account.

In addition, the changes in the carrying amount of the items included in "Non-current assets held for sale" are recognized with a balancing entry in "Unrealized gains (losses) reserve."

Also, changes in the value of the items included under the heading Non-current assets held for sale are recorded under consideration in valuation adjustments to equity.

In relation with financial instruments, the valuations at fair value reflected in the financial statements are classified using the following fair value ranking:

- i) Level I: reasonable values are obtained from quoted prices (unadjusted) in active markets for the same instrument.
- ii) Level II: the fair values are obtained from valuation techniques in active markets for similar instruments, recent transaction prices or expected cash flows, or other valuation techniques in which all significant inputs are based on directly or indirectly observable market data.
- iii) Level III: fair values are obtained from valuation techniques in which any the significant inputs is not based on observable market data.

In financial assets designated as hedged items and hedging accounting, the valuation differences are recorded against the following criteria:

- In fair value hedges, the differences occurring in coverage items and in items covered in relation to the type of hedged risk are recognized directly in profit and loss account.
- Differences in valuation for the inefficiency of cash flows hedging and net foreign investments are carried directly to the profit and loss account.
- In cash flow hedges, the valuation differences arising on the effective coverage of the coverage items are temporarily registered under the heading of valuation adjustments of net equity.
- In net foreign investments coverage, valuation differences arising on the effective coverage of the coverage items are temporarily registered under the heading of valuation adjustments of net equity.

In the last two cases, valuation differences are not recognized as result until hedged item's gains or losses are recorded in the profit and loss account or until the hedged item's expiry date.

In interest rate risk's fair value hedges of a financial instruments portfolio, gains or losses that arise when assessing the hedging instruments are recognized directly in the profit and loss account, whereas the gains or losses in the amount covered fair value changes, in regard to the hedged risk, are recognized in the profit and loss account using as counterpart the heading Adjustments to financial assets by macro-hedges.

In interest rate risk cash flows hedging of a financial instruments portfolio, the effective part of the hedging instrument's value fluctuation is recorded temporarily in Valuation adjustments of net equity until expected transactions occur, being then recorded in the profit and loss account. The ineffective portion of the hedging derivative's value fluctuation is directly registered on the profit and loss account.

# Financial liabilities

Financial liabilities are recorded at amortized cost, as defined for financial assets in the previous note, except as follows:

- Financial liabilities included in epigraphs Trading Portfolio, Other financial liabilities at fair value with changes in the income statement and financial liabilities at fair value with changes in equity, as defined for financial assets in the previous note. Financial liabilities covered by fair value hedging operations are adjusted, being registered those fair value variations in relation to the hedged risk covered by the hedge operation.
- Financial derivatives whose underlying asset are equity instruments whose fair value cannot be determined in a sufficiently objective and be settled by delivery of these contracts are valued at cost.

Financial liabilities amount's variations are recorded, in general, offset by the profit and loss account, differentiating between those that are caused by interest accrual and similar items that are recorded in the heading of Interest and similar charges, and those corresponding to other causes, which are recorded by its net amount under the heading of Net operating profit of the profit and loss account.

However, items included under the heading of financial liabilities at fair value with changes in equity value variations, are recorded temporarily in Valuation adjustments of the net equity. The amounts in the row of Valuation adjustments remain part of net equity until liabilities in which their origin are removed of the balance sheet, moment when they are written off against profit and loss account.

Financial liabilities designated as hedged items and hedging accounting valuation differences, are recorded taking into account the above criteria for financial assets in Note 2.

2.2.4 Classification and measurement of financial assets and liabilities

Financial instruments are classified into the following categories in the Group's balance sheet:

- Central bank and credit institutions deposits, which are cash balances and balances held in Bank of Spain and other central banks.
- Financial assets and liabilities at fair value with changes in the income statement: this category is made up financial instruments classified as trading portfolio and other financial assets and liabilities classified at fair value through the income statement:
  - Financial assets are those financial assets included in the trading portfolio acquired in order to be realised in the short term or which form part of a portfolio of identified financial instruments for which there is evidence of recent actions taken to obtain short-term gains, and derivative financial instruments not designated as hedge instruments, including instruments segregated from hybrid financial instruments in accordance with applicable accounting legislation.
  - Financial liabilities are those liabilities included in the trading portfolio issued in order to be repurchased in the near future or that form part of a portfolio of financial instruments identified or managed jointly for which there is evidence of recent actions to obtain shortterm gains, short positions in securities arising from sales of assets acquired under non optional repurchase agreements and loans of securities, and derivative financial instruments not designated as hedge instruments, including instruments segregated from hybrid financial. The fact that a financial liability is used to finance asset trading does not involve itself inclusion in this category.

"Other financial assets or liabilities at fair value with changes in the income statement" are:

- Financial assets that not being included in Trading portfolio, are considered hybrid financial assets and are valued at fair value and those that are managed jointly with Liabilities under insurance contracts valued at their fair value or with financial derivatives whose purpose and effect is reducing its exposure to fluctuations in fair value or which are managed jointly with financial liabilities and derivatives in order to reduce the overall exposure to interest rate risk.
- Financial liabilities designated at initial recognition by the entity or when it's done, more relevant information is obtained because:
- With it, inconsistencies in the recognition or appreciation arising on the valuation of assets or liabilities or recognizing the gains and losses will be deleted or significantly reduced, with different criteria.
- A financial liabilities or financial assets and liabilities group is managed and their performance is evaluated based on their fair value under a risk management or investment information strategy and groups documented information is issued al so on the basis fair value to the Management key staff.
- Held-to-maturity investment portfolio: This includes debt securities with fixed maturities and identified or identifiable cash flows that are classified by the Group from the outset and at any subsequent date based on the intention and financial capacity to hold them to maturity.

The debt securities included in this category are initially carried at fair value, as adjusted for transaction costs directly attributable to the acquisition of the financial asset, which are recognised in the consolidated income statement using the effective interest method, defined in applicable accounting legislation. They are subsequently carried at amortised cost, calculated based on the effective interest ratio

Credits, loans and discounts: This category includes unlisted debt securities, financing provided to third parties arising from the ordinary credit and loan activities carried out by consolidated entities and debts incurred by asset buyers and by service users. It also includes finance lease transactions in which the entities are the lessors.

The financial assets included in this category are initially carried at fair value, as adjusted for commissions and transaction costs directly attributable to the acquisition of the financial asset and which, under applicable accounting legislation, must be recognised in the consolidated income statement using the effective interest method. Following acquisition, the assets acquired in this category are carried at amortised cost.

Assets acquired at a discount are recorded in the cash amount paid and the difference between the repayment value and that cash amount is recognised as financial income, applying the effective interest method during the period to maturity.

In general, the Institute intends to hold the loans and credits granted to their final maturity dates and they are therefore carried at amortised cost in the balance sheet.

The interest accrued on the assets included in this category, calculated using the effective interest method, is recognised in the caption "Interest and similar income" in the consolidated income statement. Exchange differences on securities denominated in foreign currency other than the euro included this portfolio are accounted for as mentioned in Note 2.4. Possible impairment losses on these securities are recorded as indicated in Note 2.7. Debt securities included in fair-value hedging are recorded as mentioned in Note 2.3.

Available-for-sale financial assets: This category includes debt securities not classified as held to maturity, such as credits, loans and discounts, or as at fair value through the income statement, and equity instruments owned by the Group relating to entities which are not subsidiaries, joint ventures or associates, which have not been classified as at fair value through the income statement.

The instruments included in this category are initially measured at fair value, as adjusted for transaction costs directly attributable to the acquisition of the financial asset, which are recognised in the consolidated income statement using the effective interest method defined in Bank of Spain, Circular 4/2004, December 22, to maturity, unless the financial assets have no fixed maturities, in which case they are taken to the consolidated income statement when they become impaired or are written off the consolidated balance sheet. Following acquisition, the financial assets included in this category are carried at fair value.

Nonetheless, equity instruments whose fair value cannot be determined in a sufficiently objective manner are carried at cost in these financial statements, net of impairment calculated as explained in Note 2.7.

Balancing entries are made in "Interest and similar income" (calculated using the effective interest method) and "Return on equity instruments - Other equity instruments" in the consolidated income statement, with respect to changes in the fair value of financial assets classed as available for sale, relating to interest or dividends accrued, respectively. Impairment losses on these instruments are recorded as mentioned in Note 2.7. Exchange differences on financial assets denominated in foreign currency other than the euro are accounted for as mentioned in Note 2.4. Changes in fair value of financial assets covered by fair-value hedges are stated as mentioned in Note 2.3.

A balancing entry is made in "Equity - Measurement adjustments – Available-for-sale financial assets", in the Group's equity, with respect to the remaining changes to the fair value from the acquisition date of available-for-sale financial assets, until the financial asset is written off, when the balance is taken to "Gain/(loss) on financial transactions (net) - Available for sale financial assets" in the consolidated income statement.

 Financial liabilities at amortised cost: This category of financial instruments relates to financial liabilities that are not included in any of the previous categories.

The financial liabilities included in this category are initially carried at fair value, as adjusted for transaction costs directly attributable to the issue of the financial liability, which are recognised in the income statement using the effective interest method, defined in Bank of Spain, Circular 4/2004. Subsequently they are measured at amortised cost, calculated by applying the effective interest rate method defined Bank of Spain, Circular 4/2004.

The interest accrued on these assets, calculated using the effective interest method, is recognised in the caption "Interest and similar charges" in the consolidated income statement. Exchange differences on securities denominated in foreign currency other than the euro included this portfolio are accounted for as mentioned in Note 2.4. Financial liabilities included in fair-value hedging are recorded as mentioned in Note 2.3.

Notwithstanding the above, the financial instruments that must be classed as noncurrent assets available for sale, in accordance with the provisions of Rule Thirty Four of Circular 4/2004 of December 22, Bank of Spain, are carried in the consolidated financial statements as explained in Note 2.16.

Reclassifications between financial instruments portfolios are made exclusively in their case, according to the following assumptions:

- a) Except if the exceptional circumstances described in paragraph d) below take place, the financial instruments cannot be reclassified into or out of the category "valued at fair value with changes in profit and loss" once acquired, issued or assumed.
- b) If a financial asset, as a result of a change in intent or in the financial capacity ceases to be classified in the epigraph Held to maturity investment portfolio, it will be reclassified into "available for sale financial assets" category. In this case, the same treatment will be applied to all financial instruments classified into Held to maturity investment portfolio category, unless the reclassification is included in the circumstances permitted by applicable law (sales close to maturity, or once charged almost all the main financial asset or sales attributable to a non-recurring event that could not reasonably have been anticipated by the Institute).
- c) If we were to have a financial asset or financial liability reliable valuation for which such valuation was not previously available, and valuation at fair value would be mandatory, such as unquoted equity instruments and derivatives that have these ones by underlying asset, the mentioned financial assets or financial liabilities would be valued at fair value, and the difference with its book value would be maintained in accordance with the requirements of its portfolio type.

During 2011 and 2010, there has been no reclassification as described above.

d) If as a result of intent or financial capacity change of the Institute or, after two years of penalties set by the regulations applicable in the event of financial assets classified in held to maturity investment portfolio's sale, some financial assets (debt instruments) included in the category " available for sale financial assets" could be reclassified into the "held to maturity investment portfolio". In case, this financial instrument's fair value on the transfer date becomes its new amortized cost and the difference between this amount and redemption value is charged to the consolidated profit and loss account, using the type effective interest method over the remaining instrument's life.

During 2011 and 2010, there has been no reclassification as described above.

- e) Since 2008, a financial asset that is not a derivative financial instrument may be classified outside the trading portfolio if it ceases to be maintained for sale purpose or short term repurchase, if one of the following circumstances take place:
  - In exceptional circumstances, unless the assets could have been included in the category of credits, loans and discounts. Exceptional circumstances are those that arise from a particular event, which is unusual and unlikely to recur in the foreseeable future.
  - When the Institute has the intention and financial capacity to maintain the financial asset in the foreseeable future or until maturity, when in its initial recognition it has meet with the investment credit definition.

In these situations, assets reclassification are done at fair value, not reversing the results, and considering this value as their cost or amortized cost, as appropriate. This financial assets reclassification cannot be reclassified into Trading portfolio again.

During 2011 and 2010, there has been no reclassification of financial assets included in the trading portfolio.

# 2.3 Financial derivatives

Financial derivatives are instruments that provide a loss or gain, and allow, under certain conditions, the compensation of the totality or part of the credit and / or market risks associated to transactions and balances, using interest rate and certain rates, individual securities prices, exchange rate crosscurrency or other similar references as underlying assets. The Entity uses financial derivatives traded in bilateral organized or negotiated markets being the counterpart out of organized markets (OTC).

The Group uses financial derivatives as part of its strategy to reduce its exposure to interest rate, foreign and market exchange rate, among others. When these operations meet certain requirements of the Standards Thirty-first and thirty-second of Circular 4 / 2004 of December 22, Bank of Spain such operations are considered as "coverage."

When the Group designates a transaction as a hedge, it does so as from the time of inception of the transactions or the instruments included in those hedges, that hedge being appropriately documented. When documenting these hedging transactions the instrument or instruments hedged and hedging instrument or instruments are properly identified together with the nature of the risk which is intended to be hedged and the criteria or methods followed by the Group to measure the efficiency of the hedge over the term of the same, taking into account the risk that it is sought to cover.

The Group only consider highly effective throughout the hedge term are treated as hedge transactions. Hedging is considered highly effective if during the envisaged term any changes in fair value or cash flows attributed to the risk covered in the hedging of the financial instrument or instruments hedged are virtually fully offset by the changes in fair value or cash flows, as appropriate, of the hedging instrument or instruments.

In order to measure the efficiency of hedging defined as such, the Group analyses whether from inception and to the end of the defined hedging period defined, changes in fair value or cash flows of the hedged item which may be attributed to the hedged risk may prospectively be expected to be offset almost completely by changes in fair value or cash flows, as appropriate, of the hedging instrument or instruments and that retrospectively the results of the hedge have fluctuated in a measurement range of 80% to 125% with respect to the results of the item hedged.

Hedging transactions carried out by the Group are classified into the following categories:

- Fair-value hedges: They cover the exposure to changes in the fair value of financial assets and liabilities or firm commitments, or an identified portion of these assets, liabilities or commitments, attributable to a specific risk, provided that they affect the income statement.
- Cash-flow hedges: cover changes in cash-flow that are attributable to a specific risk associated with a financial asset or liability or a highly-probable planned transaction, provided that it may affect the income statement.

Measurement differences are recorded in accordance with the following criteria, when referring specifically to financial instruments designated as hedged components and book hedges:

- For fair-value hedges, differences in the fair value of both hedges and hedged components, with respect to the type of risk hedged, are recognised directly in the income statement.
- For cash-flow hedges, measurement differences arising on the efficient part of the cover of the hedges are temporarily carried under "Equity Measurement Adjustments Cash-flow hedges. Hedged financial instruments in this type of hedge are carried in accordance with the criteria explained in Note 2.2, without any modification due to being considered as such.

In these latter cases, measurement differences are not recognised as results until the gains or losses on the hedged item are recorded in the income statement, or until maturity.

Hedge measurement differences relating to the inefficient portion of cash-flow hedges are recognised directly under the heading "Gain/loss on financial transactions" in the income statement.

The Group interrupts hedge accounting when the hedging instrument expires or is sold, when a hedge no longer meets the criteria for hedge accounting or when the transaction ceases to be classed as a hedge.

Where fair-value hedge accounting is interrupted as stated in the preceding paragraph, in the case of hedged items carried at amortised cost, the value adjustments made for hedge accounting purposes are recognised in the income statement until the maturity date of the hedged items, applying the effective interest rate as recalculated on the interruption date.

Should a cash-flow hedge transaction be interrupted, the accumulated gain or loss from the hedge carried under the heading "Equity - Measurement Adjustments - Cash-flow hedges" in the balance sheet will remain under this heading until the planned hedge transaction takes place, at which time it will be taken to the income statement, or the cost of acquiring the asset or liability to be recorded will be adjusted, in the event that the hedged component is a planned transaction that culminates with the recording of a financial asset or liability. In the event of planned transactions, when expected not to take place, the entry made under "Equity - Measurement adjustments - Cash-flow hedges" relating to that transaction is immediately recognised in the income statement.

# 2.4 Foreign currency transactions

# 2.4.1 Functional currency

The Group's functional currency is the euro. Therefore all balances and transactions denominated in currencies other than the euro are considered denominated in foreign currency.

Set out below are the total assets and liabilities denominated in foreign currency held by the Institute, the Group's Parent entity, at 31 December 2011 and 2010 (thousands of units of each foreign currency sing):

	2011	l	2010	)	
	Assets	Liabilities	Assets	Liabilities	
Pounds sterling	320,883	2,016,884	313,642	3,115,254	
US Dollars	2,465,991	10,524,885	2,241,921	17,082,073	
Canadian dollars	138,835	782,682	97,093	1,436,057	
Swiss Francs	10,383	2,205,549	10,458	2,444,290	
Swedish kroner	-	-	-	500,001	
Norwegian kroner	-	7,875,016	-	9,375,009	
Japanese Yen	2	233,495	2	208,433	
Australian dollars	66	1,499,987	84	2,999,807	
Other traded currencies	152,151	233,597	202,508	473,962	
Other non-traded currencies	147,008	-	155,441	33,788	

The equivalent value in euros of assets and liabilities denominated in foreign currency, classified by nature, recorded by the Institute, the Group's parent entities at 31 December 2011 and 2010 is as follows:

	2011		20 <sup>2</sup>	10
	Assets	Liabilities	Assets	Liabilities
Spanish credit institutions in Spain	187.147	525.633	53.732	139,453
Spanish credit institutions abroad	3,658	41,218	110,663	82,089
Foreign credit institutions abroad	188,076	382,024	49,320	375,578
Loans/Deposits Spanish Public Administrations	-	591	-	607
Loans to/deposits with other resident sectors	1,092,741	-	1,007,451	-
Loans/Deposits non-resident Public Admin	-	-	-	-
Loans/Deposits, other non-resident sectors	1,230,969	-	1,259,977	-
Provisions denominated in foreign currency	-	422	-	474
Issued bonds and others	256	16,764,001	354	24,805,348
	2,702,847	17,713,889	2,481,497	25,403,549

When initially recognised, debtor and creditor balances denominated in foreign currency are translated to the functional currency using the spot exchange rate at the date of recognition, understood as the exchange rate for immediate delivery. After initial recognition, the following rules are applied to translate balances denominated in foreign currency to the functional currency:

- i) Monetary assets and liabilities are translated at the year-end exchange rate, understood as the average spot exchange rate at the date to which the financial statements refer.
- ii) Non-monetary items measured at cost are translated at the exchange rate on the date of acquisition.
- iii) Non-monetary items measured at fair value are translated at the exchange rate on the date on which fair value is determined.
- iv) Income and expense are translated by applying the exchange rate on the transaction date. Nonetheless, the average exchange rate for the period is used for all transactions carried out in that period, unless there have been significant fluctuations. Depreciation/ amortisation is translated at the exchange rate applied to the relevant asset.

Exchange differences arising on translation of debtor and creditor balances denominated in foreign currency are generally recorded in the income statement. Nonetheless, in the case of exchange differences that arise on non-monetary items measured at fair value, for which the fair-value adjustment is recorded under Equity Measurement Adjustments, the component of the exchange rate relating to the revaluation of the nonmonetary element is broken down.

The exchange rates used by the Group to convert balances denominated in the main foreign currencies in which it operates are the market rates at 31 December 2011 and 2010 published by the European Central Bank at each of those dates.

The net amount of exchange differences arising on the conversion of receivables and payables denominated in foreign currency is a 1,989 thousand euros loss at 31 December 2011 (589 thousand euros loss at 31 December 2010).

# 2.5 Recognition of revenue and expense

Set out below is a summary of the most significant accounting policies employed by the Group to recognise income and expense:

2.5.1 Interest income and expense, dividends and similar items

In general, interest income and expense and similar items are accounted for on an accruals basis, applying the effective interest method defined in applicable accounting legislation. Dividends received from other companies are recognised in the income statement when the consolidated entities become entitled to receive them.

# 2.5.2 Commissions, fees and similar items

Income and expense relating to commissions and similar fees, which are not included in the calculation of the effective interest rate of operations and/or do not form part of the acquisition cost of financial assets or liabilities, except for those carried at fair value through the income statement, are recognised in the income statement using different methods depending on their nature. The most significant methods used are explained below:

- Amounts associated with the acquisition of financial assets and liabilities carried at fair value through the income statement are recognised in the income statement at the payment date.
- Amounts arising from long-term transactions or services are recognised in the income statement over the term of the transactions or services.
- Amounts relating to a one-off event are recorded in the income statement when that event takes place.
- 2.5.3 Non-financial income and expense

These amounts are accounted for on an accruals basis.

2.5.4 Deferred collections and payments:

Deferred collections and payments over time are accounted for financially amount resulting from the expected cash flows at markets rates depending on their vesting period

# 2.6 Offset of balances

Only debtor and creditor balances arising on transactions which, under contract or legislation, provide for possible offset and are to be settled at their net amount, or simultaneously realised and paid, are offset and therefore presented in the consolidated balance sheet at their net amount.

# 2.7 Financial asset impairment

The carrying value of financial assets is generally adjusted against the consolidated income statement when there is objective evidence that there are impairment losses. This is the case where:

- For debt instruments, understood as loans and debt securities, when, following their initial recognition, there is an event or combined effect of various events which have a negative impact on the relevant future cash flows.
- For equity instruments, when following their initial recognition, there is an event or the combined effect of various events, making it impossible to recover their carrying value.

As a general rule, impairment financial instruments value correction is charged to the profit and loss account of the period in which such impairment is manifested and the recovery of previously recorded impairment losses, if place, are recognized in the profit and loss account of the period during which the deterioration is eliminated or reduced. In the event that the recovery of any amount in respect of the impairment recorded is considered remote, such impairment is written off the consolidated balance sheet, although the Group may carry out the necessary actions to attempt to secure collection until the definitive extinguishment of its debt claims due to lapsing, remission or other reasons.

Debt instruments and contingent risks portfolios, regardless of their owner, warranty or instrumentation, are analyzed to determine the credit risk to which the entity is exposed and to estimate coverage requirements for impairment in value. For the financial statements preparation, the Group classifies its operations in terms of its credit risk by analyzing, separately, the insolvency risk due to the customer and country risk to which they are exposed.

Debt instrument's future cash flows estimated are all amounts, principal and interest, the Group believes will receive during the instrument's life. All relevant information which provide data on the possibility of future recovery of contractual cash flows that is available at the time of financial statements elaboration is considered in this estimation. Also, in estimating instruments with security's future cash flows, are taken into account the flows that would result from its realization, less the amount of costs for its acquisition and subsequent sale, irrespective of the probability of the guarantee.

In present value of estimated future cash flows calculation the instrument's original effective interest rate is used as the update rate, if contract rate is fixed, or the effective interest rate on the date to which the statements relate determined according to financial conditions of the contract, if variable.

In the case of debt instruments measured at amortised cost, the amount of impairment losses incurred is equal to the negative difference between the carrying value and the current value of future estimated cash flows, using the original effective interest rate as the adjustment rate, if that rate is fixed, or the effective interest rate at the date of the financial statements calculated in accordance with the terms of the contract when a variable ratio In the case of listed debt instruments, market value may be used as a substitute, provided that it is sufficiently reliable to consider it to be representative of the value the Institute will recover.

Objective evidence of impairment will be determined individually for all debt instruments that are significant and individually or collectively for the groups of debt instruments which are not individually significant. When a specific instrument cannot be included in any group of assets with similar risk characteristics, it will be analysed solely on an individual basis to determine whether it is impaired and, if appropriate, estimate the impairment loss.

The collective assessment of a group of financial assets to estimate impairment losses is as follows:

- Debt instruments are included in groups with similar credit risk characteristics, indicative of debtor capacity to pay all amounts, principal and interest, in accordance with contractual terms. The characteristics of credit risk which are taken into account in order to group together assets are, inter alia, the type of instrument, the debtor's sector of activity, geographical area of activity, type of guarantee, age of amounts overdue and any other factor that may be relevant when estimating future cash flows.
- Future cash flows in each group of debt instruments are estimated based on the Group's experience of historical losses for instruments with similar credit risk characteristics to those of the respective group, following the necessary adjustments to adapt historical data to current market conditions.
- Impairment losses in each group are the difference between the carrying value of all the group's debt instruments and the present value of its estimated future cash flows.

Debt instruments not measured at fair value through changes in the consolidated income statement, contingent risks and commitments are classified, based on the insolvency risk attributable to the client or the transaction, in the categories defined by applicable accounting legislation (Bank of Spain, Circular 4/2004). For debt instruments not classified as normal risk, estimates are made regarding the specific impairment hedges necessary based on the criteria established in the above-mentioned legislation, bearing in mind the age of the unpaid amounts, the guarantees provided and the client's financial situation and, if appropriate, the guarantees.

Similarly, these financial instruments are analysed to determine the credit risk deriving from country risk, understood to be the risk affecting clients resident in a certain country due to circumstances other than normal commercial risks.

In addition to the specific impairment hedges indicated above, the Group hedges against losses inherent to debt instruments not measured at fair value through the consolidated income statement and contingent risks classified as normal through group hedges, calculated based on historical impairment and other circumstances known at the time of evaluation that relate to the inherent losses incurred at the date of the financial statements, calculated using statistical methods, that have yet to be assigned to specific transactions.

The Group has used the parameters established by the Bank of Spain, based on its sector experience and information, which determine the method and amount to be used to cover inherent impairment losses incurred in debt instruments and contingent risks classified as normal risk, which are changed regularly on the basis of the development of the data in question. This method of determining the coverage for impairment losses is based on the application of certain percentages set in the applicable accounting legislation, which vary based on the risk classification of financial instruments as established in this legislation.

In general, impairment of debt instruments is calculated by applying the following percentages to the outstanding risk:

Age of past-due amount	Percentage of cover
Up to 6 months	25%
More than 6 months and less than 9	50%
More than 9 months and less than 12	75%
More than 12 months	100%

The recognition in account consolidated profit and losses of the income of interests on the base of the contractual terms is interrupted for all the instruments of debt qualified individually and for those for those who had calculated collectively losses for deterioration for having amounts conquered with an antiquity top to three months.

The amount of impairment losses incurred in debt securities and equity instruments included under Available-for-sale financial assets is equal to the positive difference between their acquisition cost, net of any repayment of the principal, and their fair value less any impairment loss previously recognised in the income statement.

When there is objective evidence that the decline in fair value is attributable to impairment, the latent losses recognised directly under "Valuation adjustments" in Equity are recorded immediately in the consolidated income statement. If subsequently all or part of the impairment losses are recovered, the amount involved is recognised, in the case of debt securities, in the consolidated income statement for the recovery period, and, in the case of equity instruments, under "Valuation Adjustments" in Equity.

For debt and equity instruments classified under non-current assets for sale, the losses recorded previously under equity are considered to be realised and are recognised in the consolidated income statement at the date of their classification.

For shareholdings in dependent companies, Multigroup companies and Associates, the Group estimates impairment losses by comparing the recoverable amount with their carrying value. Such impairment losses are recorded in the consolidated income statement for the period in which they arise while subsequent recoveries are recorded in the consolidated income statement for the recovery period.

In the case that the probabilities of recovery any amount recorded like impairment are considered slim, are eliminated in the balance sheet, although the Instituto could carry out necessary actions to try to recover, as long as, their rights do not extinguish permanently by expiration, cancellation or other causes.

# 2.8 Financial guarantees and related provisions

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the creditor for the loss incurred when a debtor fails to perform specific payment obligation under the conditions, original or amended of an instrument of debt, regardless of their legal form, which can be, inter alia, of a surety, financial guarantee insurance contract or credit derivative.

The issuer of financial guarantee contracts recognized them under the heading "Other financial liabilities" at fair value plus transaction costs that are directly attributable to its issuance, except for contracts issued by insurance companies.

At the beginning, the fair value of financial guarantee contracts issued to a third party not connected within a single transaction in mutual independence conditions, is the premium received plus, present cash flows value to receive, using an interest rate similar to the financial assets issued by the entity with similar term and risk. Simultaneously, it will be recognized as an asset receivable the present value of future cash flows to be received at the rate of interest mentioned above.

Subsequent to initial recognition, the contracts are treated in accordance with the following criteria:

- i) The financial guarantee's commissions or bonuses value to receive is updated by recording the difference in the profit and loss account as financial income.
- ii) The value of financial guarantee contracts that have not been qualified as doubtful is the initially recognized amount less the part charged to the profit and loss account on straight-line basis over the expected life of the guarantee or by other criteria, provided that this more accurately reflects economic risks and benefits of the warranty's perception.

The classification of financial guarantee contracts as doubtful imply its reclassification under the heading of "Provisions for liabilities and contingent".

# 2.9 Accounting for leases

# 2.9.1 Finance leases

Finance leases are those in which substantially all the risks and rewards carried by the leased asset are transferred to the lessee.

Whenever the Group acts as lesser of an asset in a finance lease transaction, the sum of the present values of the amount that will be received from the lessee plus the guaranteed residual value, usually the purchase option price when the lease terminates, are recorded as financing provided to third parties. It is therefore included in Credits, loans and discounts in the consolidated balance sheet, in accordance with the nature of the lessee.

When the Group acts as the lessee in a finance lease transaction, the cost of the leased assets is recorded in the consolidated balance sheet on the basis of the nature of the asset leased and a liability is carried in the same amount, which will be the lower of the fair value of the leased asset and the sum of the present values of the amounts payable to the lessor, plus, if appropriate, the purchase option exercise price. These assets are depreciated at similar rates to those applied to the Group's property, plant and equipment for own use (Note 2.12).

In both cases, the financial income and expense on finance leases is credited and charged, respectively, to the income statement captions "Interest and similar income" and "Interest and similar charges", applying the effective interest method on the lease to estimate accrual, calculated in accordance with the applicable accounting legislation.

# 2.9.2 Operating leases

In operating leases, ownership of the leased asset and substantially all risks and rewards of ownership are retained by the lessor.

Where the Group acts as the lessor in operating lease agreements, the acquisition cost of the leased asset is carried under "Property, plant and equipment" in "Investment property" or "Other assets assigned under operating lease", depending on the nature of the leased assets. Such assets are depreciated in accordance with the policies adopted for similar property, plant and equipment for own use and the income from lease contracts is recognised in the consolidated income statement on a straight-line basis in the caption "Other operating revenue".

Where the Group acts as the lessee in operating lease agreements, the lease costs, including any incentives granted by the lessor, are charged on a straight-line basis to the income statement caption "Other general administration expenses".

# 2.10 Staff costs

#### 2.10.1 Short-term remuneration

Short-term remuneration to employees are payments made within twelve months following the end of the year in which the employees have rendered services. This remuneration is measured, without adjustment, at the amount payable for the services received and recorded, in general, as staff costs for the year and a liability accrual account is recorded for the difference between the total expense and the amount already paid.

# 2.10.2 Post-employment commitments

Pension commitments entered into by the Group with respect to employees are reflected in the collective wage agreement in force.

Institute employees are members of the Joint Employment System Pension Plan offered by the State Administration and regulated by the Pension Plan and Fund Regulation Act approved by Legislative Royal Decree 1/2002 (29 November) and enabling regulations approved by Royal Decree 304/2004 (20 February), which is included in the BBVA Empleo Doce Pension Fund, managed by Gestión de Previsión y Pensiones, Entidad Gestora de Fondos de Pensiones and deposited at BBVA.

As defined contribution commitments, the Institute has assumed annual contributions for employees that have rendered services for more than two years at 1 May of each year, regardless of whether they are career civil servants or interim government employees, contracted personnel, temporary employees or senior management. The following parameters are taken into account when calculating the annual contribution:

- The professional group to which the employee pertains.
- Length of service (understood to be the number of three-year periods the employee has worked in the Administration, regardless of the contractual arrangement).

The amounts to be contributed are those approved in the General State Budget for each year, and the expense totalling 78 thousand euros at 31 December 2011, is recorded under the heading "Staff costs" in the accompanying income statement (30 thousand euros at 31 December 2010).

# 2.10.3 Death and disability benefits and retirement bonuses

Commitments assumed with personnel for retirement bonuses and death and disability commitments prior to retirement and other similar items are estimated by calculating the present value of legal and implicit obligations at the date of the financial statements, after deducting any actuarial loss less any actuarial gain, the cost of past services yet to be recognized and the fair value of the assets that cover the commitments, including insurance policies. The entire cost of past services and any actuarial gains or losses are immediately recognized.

At 31 December 2011 a provision was recorded for post-employment commitments amounting to 173 thousand euros (95 thousand euros at 31 December 2010). Note 20.

# 2.10.4 Termination benefits

Termination benefits are recorded under the heading "Personnel expenses" and the accompanying income statement crediting the accounts "Pension fund and similar obligations" under the heading "Provisions" in the accompanying balance sheet only when the Institute is demonstrably committed to terminating an employee or group of employees before their normal retirement date, or to pay remuneration as a result of an offer made as an incentive for the voluntary resignation of the employees.

At 31 December 2011 and 2010, the Institute has not recorded any provisions in this respect as there is no plan or agreement that would require such an allocation.

# 2.11 Corporate income tax

Corporate income tax is considered as an expense and is recorded, in general, under the heading of "Income tax" of the profit and loss account.

Income tax expense for the year is calculated as tax payable on taxable income for the year, as adjusted for variations during the year in asset and liability balances arising from temporary differences, tax credits and allowances, and any tax-loss carry forwards (Note 23).

The Group considers that there is a temporary difference when there is a difference between the carrying amount and the taxable amount of an asset or liability. The amount attributed to an asset or liability for tax purposes is considered the tax base. A taxable temporary difference is understood as that which will generate a future obligation for the Institute to pay the relevant Administration. A deductible temporary difference is understood to be that which will generate for the Group some reimbursement right or a decrease in the payment to be made to the relevant administration in the future.

Tax credits and allowances and tax credits for tax-loss carry forwards are amounts that, though generated on completion of an activity or obtainment of a result, are not applied for tax purposes in the relevant tax return until the conditions stipulated in tax legislation are fulfilled, and provided the Institute considers that application in future years is probable.

Current tax assets and liabilities are amounts that the Institute expects to recover from or pay to the corresponding tax authorities within 12 months as from the date on which they are recognised. Deferred tax assets and liabilities are amounts that the Institute expects to recover from or pay to the corresponding tax authorities in future years.

Deferred tax liabilities are recognized for all taxable temporary differences. Notwithstanding the above, no deferred tax liabilities are recorded based on the recognition of goodwill.

The Group only recognizes deferred tax assets deriving from deductible temporary differences, tax credits or allowances or any tax-loss carry forwards, if they meet the following conditions:

- Deferred tax assets are only recognized in the event that the Group considers it likely that there will be sufficient future taxable profits against which they may be offset.
- In the case of deferred tax assets deriving from tax losses, they have arisen from identified causes that are unlikely to be repeated.

No deferred tax assets or liabilities are recognized when an asset is initially recorded when not deriving from a business combination and when, at the time of recognition, there was no effect on book or taxable profits.

At the time of each accounting closing, deferred tax assets and liabilities are reviewed in order to verify that they remain in force and any relevant adjustments are made in accordance with the results of the analysis performed.

# 2.12 Property, plant and equipment

#### 2.12.1 Property, plant and equipment for own use

Property, plant and equipment for own use includes those assets that are owned or acquired under finance leases that the Institute holds for its own current or future use for administrative purposes or for the production or supply of assets and when they are expected to be used for more than one financial year. Among other things, this category includes property, plant and equipment received by the Group for the total or partial settlements of financial assets that represent debt claims against third parties which are expected to be used on a continuous and internal basis. Property, plant and equipment for own use is carried in the balance sheet at acquisition cost, which consists of the fair value of any compensation paid plus any monetary payments made or promised, less accumulated depreciation and, if appropriate, any estimated losses that result from comparing the net value of each item with the relevant recoverable amount.

For these purposes, the acquisition cost of adjudicated assets that become part of property, plant and equipment for own use by the Group, is similar to the net amount of the financial assets exchanged for adjudication.

Depreciation is calculated on a straight-line basis based on the acquisition cost of the assets concerned less any residual value, with the understanding that land on which buildings and other structures are located have an indefinite life and is therefore not depreciated.

Annual allocations to depreciation of property, plant and equipment are charged against the heading "Depreciation-Property, plant and equipment" in the consolidated income statement and basically equals the following depreciation rates (calculated based on the estimated average useful life of the assets concerned:

	Annual rate
Buildings Plant Furnishings and office equipment Data – processing equipment	2% 4 to 15% 10% 25%
Vehicles	16%

At the time of each accounting closing, the Group determines whether or not there are any internal or external indications that the net value of its property, plant and equipment exceeds their recoverable value. If so, the book value of the asset concerned is reduced to the recoverable value and future depreciation charges are adjusted in proportion to the adjusted book value and the new remaining useful life, if a new estimate is required. This reduction in the book value of property, plant and equipment for own use is applied, if necessary, by charging the heading "Impairment losses-Property, plant and equipment" in the consolidated income statement.

Similarly, when there are indications that the value of impaired property, plant and equipment has been recovered, the Institute recognizes the reversal of the impairment loss recorded in prior years by crediting the heading "Impairment losses - Property, plant and equipment" in the consolidated income statement and, consequently, adjusts future depreciation charges. Under no circumstances may the reversal of an impairment loss affecting an asset increase its book value above that which it would have had if the impairment losses had not been recognized in prior years.

In addition, the estimated useful life of property, plant and equipment for own use is reviewed at least on an annual basis in order to detect significant changes in these estimates and, if any are detected, adjustments will be applied by correcting the depreciation charge made to the income statement in future years in accordance with the new estimated useful lives.

Repair and maintenance expenses for property, plant and equipment for own use is charged against results for the year in which they are incurred under the heading "Other general administration expenses" in the consolidated income statement. The financial expense incurred as a result of financing property, plant and equipment for own use is charged against the income statement at the time of accrual and these expenses do not form part of their acquisition cost.

# 2.12.2 Real estate investments

The consolidated balance sheet heading "Real estate investments" recognizes the net value of land, buildings and other structures that are held for rental or to obtain a capital gain on their sale as a result of increases in their future market prices.

The criteria applied for recognizing the acquisition cost of real estate investments for depreciation, for the estimate of their respective useful lives and for recording any possible impairment losses, coincides with those described with respect to property, plant and equipment for own use (Note 2.12.1).

# 2.13 Intangible assets

Intangible assets are considered to be identifiable non-monetary assets that, while not existing physically, arise as a result of a transaction or have been internally developed by the Group. Only intangible assets whose cost may be reasonably estimated on an objective basis and which the Institute deems likely to provide a future financial benefit are recognized for accounting purposes.

Intangible assets, other than goodwill, are recognized in the balance sheet at their acquisition or production cost, net of accumulated amortization and any impairment losses they may have suffered.

Intangible assets may have an "indefinite useful life" when the analysis performed on all relevant factors leads to the conclusion that there is no foreseeable limit to the period over which they are expected to generate net cash flows for the Institute, and they have an "definite useful life" in all other cases.

Intangible assets with an indefinite useful life are not amortized, although at the time of each accounting closing the Institute reviews their respective remaining useful lives in order to ensure that they continue to be indefinite. If this is not the case appropriate action is taken.

Intangible assets with a defined life-span are amortised accordingly using criteria that are similar to those applied to property, plant and equipment. The annual amortisation charge for these intangible assets is carried in the consolidated income statement caption "Amortisation - Intangible assets".

For intangible assets with both an indefinite and definite useful life, the Institute recognises any impairment in those assets and uses as a balancing entry "Asset impairment losses (net) - Other intangible assets" in the consolidated income statement. The methods applied to recognise impairment losses on these assets and, if appropriate, the recovery of impairment losses recognised in prior years are similar to those applied to property, plant and equipment (Note 2.12.1).

# 2.14 Provisions and contingent liabilities

When preparing the financial statements the Group differentiates between:

- Provisions: creditor balances that cover obligations in force at the balance sheet date deriving from past events that could give rise to financial losses for the entities. Although such losses are regarded as probable and are specific in nature, their amount and/or settlement date cannot be determined.
- Contingent liabilities: possible obligations deriving from past events which may materialise subject to one or more future events beyond the control of the Institute.

The Group's consolidated financial statements include all significant provisions for obligations classed as probable. Contingent liabilities are not recognized in the consolidated financial statements, but rather information is provided in accordance with the requirements of Bank of Spain Circular 4/2004 of December 22, (Note 20).

Provisions which are quantified using the best information available on the consequences of the event that justifies them and are re-estimated at the year end. They are applied to meet the specific obligations for which they were originally recognised and fully or partially reversed should such obligations cease to exist or decrease.

At the 2011 and 2010 year end, a number of legal proceedings and claims had been initiated against the Group, arising in the ordinary course of business. ICO's legal advisors and its directors understand that the finalisation of these proceedings and claims will not have a significant effect other than that provided for, if appropriate, in the consolidated financial statements in which they finalise.

Provisions deemed necessary as stated above are charged or credited to the consolidated income statement caption "Transfers to provisions (net)".

# 2.15 Cash-flow statements

The terms employed in the cash-flow statements have the following meanings:

- Cash flows: Inflows and outflows of cash and cash equivalents, understood as short-term investments which are highly liquid and involve a low risk of changes in value.
- Operating activities: typical credit institution activities and other activities that may not be classified as investing or financing activities.
- Investing activities: acquisition, sale or disposal through other means of noncurrent assets and other investments not included in cash and cash equivalents.
- Financing activities: activities that cause changes in the size and composition of equity and liabilities and do not form part of operating activities.

# 2.16 Non-current assets for sale

The heading "Non-current assets for sale" on the consolidated balance sheet records the book value of individual items that are very likely to be so Id in their present condition within one year as from the date of the financial statements.

When in exceptional cases the sale is expected to occur over a period exceeding one year, the Entity assesses the updated sale cost, accounting time value fluctuation under the heading of gains (losses) on non-current assets for sale not classified as discontinued operations in the profit and loss account.

Consequently, the carrying amount of these items, which may be financial or non-financial in nature, will foreseeably be recovered through their selling price rather than through continued use.

Specifically, the real estate assets or other non-current assets received by the Group to pay off all or part of the payment obligations of its debtors with regard to the Institute are deemed non-current assets for sale, unless the Group has decided to use these assets on an on-going basis.

Symmetrically, "Liabilities associated with non-current assets for sale" includes the credit balances associated with groups or for interruption in the operations of the Group.

Non-current assets held for sale are generally measured at the lower of their carrying amount when they are recognised as such and their fair value net of estimated cost of sales. While included in this category, property, plant and equipment, and intangible assets, subject to depreciation and amortisation by nature, are not depreciated or amortised.

In the event that the carrying amount exceeds the fair value of the assets, net of cost of sales, the Institute adjusts the carrying amount of the assets by the amount of the excess and makes a balancing entry in the caption "Asset impairment losses (net) - Non-current assets held for sale" in the consolidated income statement. In the event that the fair value of the assets were to increase at a later date, the Group reverses the losses previously recorded in the accounts, increasing the carrying value subject to the limit of the amount prior to their eventual impairment, against Asset impairment losses (net) - Non-current assets for sale in the consolidated income statement.

The results from the sale of non-current assets for sale are presented under "Gains/(Losses) on noncurrent assets held for sale not classified as discontinued operations" in the profit and loss account.

However, financial assets, assets from employee salaries, deferred tax assets and assets for insurance contracts that are part of a group of file or an interruption in operation, not be valued in accordance with in the previous paragraphs, but in accordance with the principles and rules applicable to these concepts, which have been explained in the preceding paragraphs of Note 2.

# 3. CUSTOMER SERVICE

On 24 July 2004, Order Eco 734 regarding customer service operations entered into force. This has the purpose of regulating customer services and ombudsmen at banks and financial institutions. With respect to this Service, and although the Group is not obligated to have a customer service department, the Group attends to all claims and complaints that it receives during the course of its business as a financial agency. In order to attain the highest quality of service, the Institute decided to create a Unit in December 2006 to centralize the reception, processing, and a response to all complaints and suggestions received from suppliers, users and clients of ICO.

In 2011 a total of 1,319 complaints were received, (4,602 in 2010) which were addressed within an average of 6,2 working days, (6.2 in 2010). Sixty-two percent of the total related to credit transactions in the intermediary line and were therefore passed on to the relevant financial institutions.

# 4. DISTRIBUTION OF RESULTS

The distribution of 2011 ICO profits, which totalled 46,592 thousand euros, has not yet been decided by the General Council of the Institute, the Group's Parent entity. Such distribution will conform to the bylaws applicable to the Institute.

The distribution of 2010 profit (29,960 thousand euros) is pending approval by the Ministry of Finance.

# 5. RISK EXPOSURE

# 5.1 Risk - General aspects

Risk is inherent to financial activity. Properly measuring, managing and controlling risk must contribute to attaining adequate margins and the maintenance of an entity's solvency based on the confidence of clients, investors and employees.

Without any intention of exhaustively classifying the risks faced by a financial institution, they may be classed into four categories: Liquidity risk, market risk, credit risk and operating risk.

- Liquidity risk: The risk incurred as a result of an absence of sufficient liquid resources to comply with obligations.
- Market risk: Covers the influence on the income statement and equity exercised by adverse changes in relevant financial variables, such as domestic or foreign currency interest rates, exchange rates, share prices, etc. This risk may be subdivided into two large groups: Balance sheet or structural market risk and market risk affecting trading portfolios.
- Credit risk: This refers to the risk of not fully recovering the principal and interest relating to our investments within the projected periods. This risk may also be subdivided into two broad groups: Counterparty risks with banking institutions and credit risk regarding investment transactions.
- Operating risk: Incurred as a result of administrative, internal, accounting, computer, legal or external errors due to unforeseen circumstances.

As a credit institution, the ICO, the Parent entity, is exposed to this group of risks that must be identified, measured and monitored in order to operate efficiently. This is done in accordance with the Risk Policy Manual approved by the General Council, which contains the different methods, applicable legislation, procedures and organisational structure.

# 5.2 Organisational structure

In order to cover the entire risk spectrum, within its organisational structure the Institute, the Group's Parent entity (according to Presidential Organizational Circular 1/2011 of March 30<sup>th</sup>), has created specialised units that report to the Sub-Directorate for Risk and Accounting, which reports to the General Directorate for Control and Administration.

The Sub-Directorate for Risk's functions include drafting and proposing internal risk policies and methods for analysing, managing and monitoring all the Institute's risk, assessing the admissibility of ICO credit risk and overseeing ICO's adaptation to national and international risk regulations, while driving, coordinating and supervising the performance of the units under its remit.

The three specialized credit risk areas are Risk Acceptance, Global Risk and Monitoring and Supervision, each one with specific duties.

The primary duties of the Global Risk area are:

- Preparing, proposing and controlling of financial risk measurement methodologies applied by the Institute: market risks, cash transactions, credit and liquidity: preparing a status report on financial risks.
- Overseeing compliance with the limits of approved financial risks and policies; monitoring volumes and prices.
- Regularly reviewing lines of credit by analysing of the financial-economic situations of counterparties. Analyse requests made by new counterparties for new lines of credit, controlling compliance with balance sheet lines of credit and supervising concentration levels with intermediaries.
- Reviewing and defining measurement, back-testing and stress-testing systems on an on-going basis.
- Proposing criteria for market valuation of new financial products, establishing methodologies and risk measurement.
- Analysing the adaptation of EU Directives and national legislation regarding risks within its competency.

The Policies and Acceptance department, whose main functions include:

- Evaluating the admissibility of the risk for new asset products.
- Where appropriate analyzing and preparing credit risk reports on transactions proposed to the competent body.
- Analyse, if appropriate, ICO's investment risk limits regarding clients and economic groups, particularly for economic sections considered to be necessary based on industry analysis.
- Analysing and evaluating the risks assumed by ICO under any proposed modification to transactions already formalised that requires the approval of decision-making bodies.
- Analysing the adaptation of EU Directives and national legislation regarding risks within its competency.

The primary duties of the Monitoring and Supervision Area are:

- Analysing the proposal for mediation lines proposed to the competent body and monitor and verifying compliance with the conditions for the current portfolio, making all necessary physical inspections and proposing any appropriate corrective action in the event of any failure to comply.
- Establishing and maintaining an internal rating system, country risk classification system and an operational risk methodology.
- Exercising special control over doubtful and default transactions and making subjective proposals for provisions.
- Overseeing transactions and client risks: verifying compliance with the conditions of direct market and economic policy transactions formalised and managed by the Group, until maturity. Calculating and monitoring ratios and covenants, controlling all required documentation, payment status and guarantees, as well as the development of credit risk as a whole.
- Managing of supporting documentation for the Monitoring Commission.
- Analysing the adaptation of EU Directives and national legislation regarding risks within its competency.

In summary, the Institute, the Parent company, has a team of professionals specialised in each type of risk, each one responsible for his/her own duties and acting in accordance with the inspirational risk principles, the risk policy manual in force and existing internal procedures.

In February 2012, the Institute approved Circular 2/2012 on internal organisation, leading to a complete overhaul of its organisational structure. The changes for the Sub-Directorate for Risk were not significant, except for the inclusion, together with the current areas and departments, of the Central Analysis area. This area is in charge of analysing the viability of direct loan transactions for SMEs, micro companies and self-employed individuals and proposing improvements to the rating systems for these risk segments.

# 5.3 Liquidity risk at the Group

National legislation contains several references to be taken into consideration when adequately managing this risk. There are all so international recommendations of reference, such as those established in the document published by the Basel Committee on Bank Supervision in February 2000 (Sound Practices for Managing Liquidity in Banking Organizations), which contains guidelines that must be taken into consideration when establishing a system for measuring, managing and monitoring liquidity risk. The establishment in December 2011 of new solvency and liquidity requirements, which is an updated version of the solvency and liquidity publication issued in December 2010, (International framework for liquidity risk measurement, standards and monitoring, and a global regulatory framework for more resilient banks and banking systems) represents a new step in the direction of guaranteeing more efficient parameters in liquidity measurement and control.

In ICO, the Group's Parent entity, is defined an organisational structure responsible for reporting, monitoring and controlling liquidity risk.

The measurement used to monitor balance sheet liquidity risk is the liquidity gap. The liquidity gap provides information regarding the mismatches between the inflow and outflow of funds on a daily basis for periods of up to 12 months covering all balance sheet and off-balance sheet items that produce cash flows on the actual date occurring.

Short-term liquidity is monitored on a daily basis. On a weekly basis, and at the end of each month, this monitoring and control of limits takes place with a horizon of 1 week, 1 month, 3 months and 6 months.

The ICO has established quantitative limits and alerts that allow us to get ahead of possible situations of liquidity tension.

There is also a policy of diversifying sources of basic finances in order to minimise this risk, and a regular review of liquidity including any projections for new activity, in order to establish needs in terms of amounts and dates of financing sufficiently in advance.

Generally, the Institution raises liquidity in a variety of ways, including tapping the interbank market and issuing debt securities in wholesale and retail markets.

The financial crisis affecting international and national markets, rooted in the US sub-prime market crisis, triggered a sharp downturn by financial markets, causing the resources for raising financing on which both international and national financial entities rely to decline sharply. As a result, fundraising on the interbank market or through the issuance of debt securities was also seriously affected.

Faced with this scenario, decisions were taken throughout 2011 to adapt the Group to the new circumstances in order to secure the liquidity needed to meet its payment commitments on time and achieve its strategic operating, investment, and growth targets. Thanks to these measures, the Group's management does not anticipate any liquidity shortages in 2012.

#### Maturities of the financial assets and liabilities of the Institution, as parent of the Group.

The following table shows the classification by residual maturity of ICO's assets and liabilities, net of valuation adjustments and amounts in foreign currency, at 31 December 2011:

	Thousands of euros							
	Upon	Up to 1	1 - 3	3 - 6	6 - 12		More than

# Analysis of euro-denominated trading and hedging derivatives of the Institute, as parent of the Group.

The following table shows the contractual maturities for euro-denominated derivatives recognized as financial assets and financial liabilities at 31 December 2011 and 2010 (except for embedded derivatives in hybrid financial instruments) and loan commitments considered financial derivatives as they can be settled through netting, in cash or with another financial asset, in which the maturities are deemed essential for understanding the Institute's cash flow projections.

#### At 31 December 2011

	Thousands of euros								
	Up to one year	From 1 to 5 years	From 6 to 10 years	From 11 to 15 years	From 16 to 20 years	Total			
Derivatives held for trading	503,076	132,539	60,000	118,308	38,590	852,514			
- Of which: credit commitments considered as derivatives			<u> </u>			<u> </u>			
Hedging derivatives	17,108,133	54,001,452	11,033,481	1,932,337	465,415	85,540,818			
	17,611,209	54,133,991	11,093,481	2,050,645	504,005	85,393,332			

# At 31 December 2010:

	Thousands of euros								
	Up to one year	From 1 to 5 years	From 6 to 10 years	From 11 to 15 years	From 16 to 20 years	Total			
Derivatives held for trading	4,169,440	112,700	79,839	118,308	38,590	4,518,877			
- Of which: credit commitments considered as derivatives			<u> </u>			<u>-</u>			
Hedging derivatives	17,020,971	37,775,406	7,876,268	862,045	1,045,718	64,580,408			
	21,190,411	37,888,106	7,956,107	980,353	1,084,308	69,099,285			

With respect to the information presented in the preceding tables, we would highlight that:

- Where a counterparty can choose when an amount should be paid, the derivative is assigned in the first period in which payment to the Institute may be demanded;
- The amounts shown relate to undiscounted contractual amounts. Interest-rate swaps are shown at their net amount if settled by differences, loan commitments considered derivatives at their gross amount and all remaining financial derivatives at their contractual amount of exchange unsettled by differences;
- For derivatives with no stated contractual amount at the reporting date, e.g. because they depend on the performance of an index, the residual maturity considered for classification purposes in the preceding tables was determined based on prevailing conditions at 31 December 2011 and 2010, respectively.

#### Liquidity GAP analysis of the Institute, as parent of the Group.

As explained above, a core feature of the Group's liquidity management is the analysis of the maturities of its various financial assets and liabilities based predominantly on their expected maturities, rather than their contractual maturities.

The Group uses this approach because history has shown that it provides a more accurate picture of how the Institution's cash inflows and outflows are produced.

The tables below compare cash inflows and outflows at different maturities up to 12 months for the Institute, as parent of the Group. Inflows and outflows in foreign currency are shown at their equivalent value in euros.

#### At 31 December 2011

		Thousands of euros								
	Up to 1 month	1 to 3 months	3 to 6 months	6 to 12 months						
Equivalent inflows in euros	4,717,587	5,615,780	8,755,292	12,693,440						
Equivalent outflows in euros	(3,628,924)	(5,451,124)	(8,115,742)	(10,835,956)						
Partial GAP	1,088,663	164,657	639,549	1,857,485						
Cumulative GAP	1,088,663	1,253,320	1,892,870	3,750,355						

At 31 December 2010:

		Thousands of euros								
	Up to 1 month	1 to 3 months	3 to 6 months	6 to 12 months						
Equivalent inflows in euros	4,833,832	9,455,990	10,134,136	15,537,711						
Equivalent outflows in euros	(4,527,463)	(12,759,714)	(11,828,204)	(14,215,648)						
Partial GAP	306,369	(3,303,724)	(1,694,068)	1,322,063						
Cumulative GAP	306,369	(2,997,355)	(4,691,423)	(3,369,360)						

# 5.4 Market risk at the Group

As indicated above, it is possible to distinguish two major groups within this risk: balance sheet or structural market risk and the trading portfolio risk. In accordance with its internal policy, ICO, the Group's Parent entity, is currently attempting to minimize trading portfolios and hold only those that, owing to the application of current legislation, do not allow for their classification as hedging or investment. Accordingly, market risk results almost exclusively from ordinary activities.

1) There are two basic criteria through which exposure to changes in interest and exchange rates is revealed: Yield and Solvency.

Yield: At ICO this fundamentally derives from the income statement and therefore the relevant variable is the Financial Margin.

Solvency: A company's equity is the primary guarantee for lenders. The value of this capital or equity is the main criterion for measuring solvency.

Using these considerations, the ICO has implemented a system for measuring market risk based on three pillars: a) Calculation of the sensitivity of the annual Financial Margin. b) Calculation of the sensitivity of equity and e) Calculation of hypothetical trading portfolios, if any exist.

2) The methodology. In order to measure balance sheet risks relating to the Financial Margin, the weighted partial maturity gap method is used, calculated as the difference between asset and liability volume and off-balance sheet transactions that mature or renew interest rates within the following 12 months, weighted by the period affecting the Margin.

In order to measure the sensitivity of Equity, the duration gap method is used. Based on these modified methods, the duration gap is obtained as the difference between the duration of assets and liabilities, from which the sensitivity gap may be obtained.

With respect to Value at Risk, the methodology will be determined by the type of portfolio involved and may be based on parametric, historical simulation or Monte Carlo methodology.

**3) Degree of risk.** The decision regarding the degree of risk assumed by ICO, the Group's Parent entity, is the responsibility of Senior Management, at the proposal of the Directorate for Risks and Accounting, establishes the acceptable limits based on the particular characteristics of the ICO. These limits are reviewed regularly and, at least, on an annual basis.

The sensitivity of net interest income at 31 December 2011 to movements in interest rates of 100 base points was 3.19% in the euro (1.20% at December 31, 2010), 0.20% in the US dollar (0.24% at December 31,2010) and 0.10% in the Pounds sterling (0.01% at December 31, 2010). The sensitivity to exchange rate fluctuations (movements of +/- 10%) was 0.24% and 0.06% respectively (0.51% and 0.11% at December 31, 2010). The aggregate amount would represent 3.79%.

The sensitivity of equity at 31 December 2011 to movements in interest rates of 100 bp and fluctuations in the exchange rate of 10% was 0.10% in the euro (0.39% at December  $31^{s}t$ , 2010), 0.07% in the US dollar (0.09% at December  $31^{s}t$ , 2010) and 0.03% in the Pound sterling (0.02% at December 31st, 2010). The sensitivity to exchange rate between USD/EUR was 0.06% and between GBP/EUR 0.05% (0.19% and 0.05% in respect of the exchange rate at December 31st, 2010). The aggregate amount would represent 0.30%.

4) Risk modification. The last step for efficient risk management is the capacity to modify out maturity and duration gaps in order to bring them into line with desired risk values at any given moment, using balance sheet or off-balance sheet instruments based on market opportunities and in accordance with the management decisions taken within the authority granted for this purpose or the Financial Management Department, the Directorate General for Investments and Finance or the Operations Committee.

The principal currencies used by ICO to present its balance sheet at 31 December 2011 are the euro, US dollar and Pound sterling, which account for 95% of total balance sheet and off-balance sheet transactions, of which approximately 89% is in euros, 9% in US dollars and the remaining 2% in Pounds sterling.

With respect to currencies other than the euro and dollar with which the Group operates, its balance sheets are closed to interest and exchange rate risks either because the operation involves financing obtained in the currency concerned and converted to euros using a derivative instrument that completely covers all currency flows, or because the financial of a certain asset is custom designed to avoid these risks.

In addition to the establishment of limits, monitoring and control of regular compliance, the Group has established an integrated system through the application of measurement, management and control of risks in order to verify the influence that various development scenarios involving relevant financial variables could have on the Financial Margin or on Equity. On a regular basis the development of the controlled variables is observed given different scenarios such as, for example, development estimates provided by the Analysis Service at the ICO, should there be non-parallel movement in interest curves or market stress situations.

# 5.5 Credit risk at ICO

As has already been mentioned there are two broad groups: Counterparty and country risk.

The first group includes transactions with financial institutions, both on and off the balance sheet. Monitoring activities are carried out by using a system that integrates the administration of transactions and the risks deriving from them in real time, providing operators with current information regarding lines of credit available at any given moment.

The competent bodies at ICO, have defined and approved a method for credit risk revision called consuming counterparty lines of credit based on the evaluation of the transactions at market prices plus a potential future or add-on risk that is measured as a percentage of the nominal value of the transaction, calculated as a potential maximum loss of 95% of confidence over the life of the transaction. The methodology is reviewed on a regular basis and at least once a year, and the add-ons are adjusted at least on a half-yearly basis.

The basic criteria for establishing counterparty lines are also approved by ICO's General Council on an annual basis. These counterparty lines are subdivided into two broad groups as a result of the operating characteristics of the ICO. The first of the counterparty lines relate to cash transactions. The other counterparty line relates to mediation transactions, transactions in which the ICO finances various investment projects through framework programmes concluded with various entities operating in Spain such as, for example, lines for small and medium-sized businesses.

The transactions involving derivatives contracted by ICO have counterparties with high credit ratings such that at least 99% of them maintain an Agency rating equal or higher than A-. These counterparty institutions operate at the national and international level.

The ICO has structured several stages of evaluation and control relating to company credit risk: Acceptance, Monitoring and Oversight.

Acceptance performs an analysis of companies and transactions based on a going concern evaluation and guarantees are examined to issue an opinion as to the risk and the potential client, which is the basis for taking decisions by the Operations Committee or General Council, as appropriate.

The Monitoring process (direct loans) has the purpose of making the Group's credit portfolio of the highest quality, i. e. ensures that our loans are repaid on a timely basis on the agreed dates. The basic monitoring unit is the client, not the transaction, such that any incident affecting a transaction affects the rating for a client and its group. This is achieved through ongoing controls, regular reviews, rating updates and alert systems such that the entire portfolio is classified into one of the following categories: Normal monitoring, Special monitoring and Recovery.

Finally, Oversight is performed based on the mediation lines as financed companies are indirect ICO clients in order to establish and maintain a control environment for credit institutions and to verify compliance with the agreements concluded with credit institutions with respect to: i) investments financed through ICO funds and ii) beneficiary conditions meeting the terms of agreement concerned.

Under the heading regarding credit risk, special mention must be made of the so-called country risk. Country risk refers to the solvency of all counterparties characterised as pertaining to an area geographically, politically and legally defined as a State. In this connection, ICO, the Group's Parent entity, has approved a methodology for measuring country risk that follows current legislation and complies with the objective of evaluating countries by risk group based on multiple criteria, thereby allowing for a defined policy when recording provisions for that country risk, evaluating direct loan transactions and segmenting the non-resident loan portfolio and introducing Basel II criteria. Rating agency and OECD-CESCE evaluations are used as source of information when classifying countries into risk groups and these classifications are reviewed on a monthly basis.

In order to reduce the Institute's credit risk with Spanish financial institutions deriving from the Intermediary Lines since 2001 and avoid the concentration of risk in the same, a securitization transaction was completed that will enable a more consistent management of the Group's credit risk (Note 9).

The following chart shows the maximum credit risk exposure assumed by the Group at December 31, 2011 and 2010 without deducting collateral or other credit enhancements received to ensure compliance of debtors:

	Thousand of euros December 31,2011						
Types of instruments	Available for sale financial assets	Credit, Ioans and discounts	Held to maturity investment portfolio	Hedging derivatives	Off Balance Sheet Items	Trading portfolio	
Debt instruments	-	-	7,412,672	-	-	-

	30,042,355	100%	22,784,426	100%

# 5.6 Operating risk at the Group

It is increasingly more important to measure and control operating risks, especially bearing in mind the New Capital Accord (Basel II). The risk deriving from inadequate processes, incorrect records, system failures, legal risks or the risk of loss inherent to the formalisation of transactions is included.

In this area, certain tools have been developed to facilitate the task of covering operating risk. Specifically, these tools consist of the policies covering the monthly monitoring of the control panel or activity indicators, the development of processes and internal procedures, the definition of client and operations monitoring and internal control of incidents, or the existing contingency plan. The regular controls applied to procedures and operations should be emphasized, which are performed by internal and external audits.

# 5.7 Active credit risk with companies

#### 5.7.1. Classification by sector

Taking into account a classification by sector, the distribution of the outstanding risk, not including valuation adjustments and certain items, classified as loans and advances to other debtors and financial guarantees, is as follows:

	Millions of euros				
	201	1	201	0	
	Amount	% s/total	Amount	% s/total	
Outstanding risk by sector					
Investment properties	1,223	5%	956	4%	
Construction of social housing for sale	12	0%	0	0%	
Construction of social housing for rent	617	3%	498	2%	
Acquisition and development of land	341	1%	348	2%	
Other	253	1%	110	1%	
Investment intangible assets	0	0%	0	0%	
Investment tangible assets	15,205	65%	14,926	68%	
Renewable energies	1,536	7%	1,238	6%	
Water infrastructures	574	2%	528	2%	
Electricity infrastructures	1,932	8%	2,232	10%	
Gas and fossil fuel infrastructures	1,740	7%	1,790	8%	
Transport infrastructures	7,273	31%	7,329	33%	
Tourism and leisure	189	1%	211	1%	
Social-health infrastructures	332	1%	251	1%	
Telecommunications	26	0%	102	0%	
Audiovisual production and exhibition	55	0%	53	0%	
Business parks and other constructions	26	0%	27	0%	
Other	1,522	7%	1,165	5%	
Acquisitions of companies	2,036	9%	2,450	11%	
General corporate needs	1,132	5%	1,197	5%	
Restructuring of liabilities	192	1%	238	1%	
General State Budgets	3,444	15%	1,981	9%	
Financial intermediary services	45	0%	252	1%	
	23,277	100%	22,000	100%	

As with other business figures, at 31 December 2011 and 2010 the outstanding risk is concentrated in "Transport infrastructures" and "Acquisition of companies". In 2011 and 2010, the outstanding risk relating to both sectors amounts to 10,717 million of euros and 9,689 million of euros respectively (44% of the total outstanding risk each year). In the "Acquisition of companies" sector are set the society mergers and acquisitions approved 3 or 4 years ago. As these financings become due, the weight of this sector will decrease.

# 5.7.2 Classification by geographic location of financial investments

The total risk at 31 December 2011 is distributed as follows: 86% in transactions financing investments in Spain (86% at 31 December 2010) and 14% in transactions aimed at financing investment projects in other countries (14% at 31 December 2010).

Of the domestic total, the distribution of outstanding risks by autonomous region is similar to last year; Madrid stills being the regions with the greatest concentration, 14% (30% at 31 December 2010); followed by Cataluña, 10% (13% in 2010), Autonomous Community of Valencia, 8% (7% in 2010) and Andalucía, 7% (8% in 2010); not taking into account the risks attributed to "general" domestic relating to transactions that, in light of their nature, are not located in a specific geographic area but throughout Spain.

Transactions taking place in the international market at 31 December 2011 and 2010 are distributed as follows in accordance with the active foreign risk:

	Millions of Euros					
	2011		2010	2010		
	Amount	%	Amount	%		
European Economic Community	719	21%	1,089	35%		
Latin America	843	25%	680	22%		
Brazil	-	-	165	5%		
United States	1,007	30%	762	24%		
Rest of Europe (not EEC)	8	0%	54	2%		
Other	795	24%	396	12%		
	3,372	100%	3,146	100%		

# 5.7.3 Refinancing

There are no unprovisioned financial assets that would have matured or been impaired had their respective conditions at 31 December 2011 or 2010 not been renegotiated.

# 5.8 Other information. Information on late payments to suppliers

In compliance with Law 15/2010 of 5 July, amending Law 3/2004 of 29 December establishing measures against late payment in commercial transactions, developed via a resolution passed by the Spanish Audit and Accounting Institute (ICAC) on information concerning late payment to suppliers in commercial transactions to be included in the Notes to financial statements, we should point out the following:

- Given the Group's core business (financial activity), the information presented in this Note concerning late payment relates exclusively to payments to suppliers of services and sundry suppliers to the Institution and payments to commercial suppliers other than depositors and holders of ICO securities. With the latter, the contractual and legal payment deadlines of both liabilities due on demand and with deferred payment have been met dutifully.
- Regarding the information required by Law 15/2010, of 5 July with respect to the Institution's commercial and service suppliers and considering the provisions of the second transitional provision of ICAC Resolution of 29 December 2010, at 31 December 2011 and 2010, none of ICO's deferrals exceeded the statutory limit (determined in accordance with the nature of the good or service received by the company as provided for in Law 3/2004, of 29 December, establishing measures to combat late payment in commercial transactions).

# 5.9 Risk concentration and other specific ICO regulation

The bylaws of ICO, the Group's parent, state that the Institute is subject to the provisions of Royal Decree 1343/1992 of 6 November regulating credit institutions and implementing Law 13/1992 of 1 June on the consolidated capital and supervision of financial institutions and implementing regulations, except though regarding limits on large risks.

Royal Decree-Law 12/2012, of 30 March, establishing the treatment of exposures to financial institutions resident in EU member states, was passed on 31 March 2012.

# 5.10 Information on construction and property development finance (purpose of the loan).

Regarding property risk portfolio policies and strategies, the Institute has acceptance processes with specific policies for this type of product (e.g. experienced developers, percentages of accredited sales, data on rental demand by independent experts), assessing the economic and financial feasibility of projects.

Payments for certified work are subsequently validated and controlled, construction progress is monitored and sales are controlled.

In addition, studies are conducted to detect the reasons behind the payment difficulties of customers currently in arrears in order to pose solutions that allow for transactions to be completed successfully.

The table below details the finance granted for construction and property development, along with the related hedges (in thousands of euros):

Financiación a la construcción y promoción inmobiliaria y sus coberturas:

	Thousands of euros							
		2011			2010

None of the foreclosed assets on the Group's balance sheet (non-current assets classified as held for sale, Note 12) comes from finance granted to construction companies and property developers, or mortgage loans to households for home purchases, nor do they consist of equity instruments, investments and finance to non-consolidated companies holding the assets.

# 6. CASH AND DEPOSITS AT CENTRAL BANKS

An analysis of the balances of this caption in the consolidated balance sheets as at 31 December 2011 and 2010 is as follows:

	Thousands o	f euros
	2011	2010
Cash on hand	12	1
Deposits at Bank of Spain Mandatory to comply with minimum reserve ratios Not mandatory	<u>31,110</u> 28,448	424,055 422,803
Accrued interest	2,662	1,252
	31,122	424,056

# 7. TRADING PORTFOLIO

The total balance under this heading in the balance sheets at 31 December 2011 and 2010 is made up of trading derivatives.

Transactions involving trading derivatives relate mainly to instruments with which the Group manages balance sheet positions globally but which do not meet the requirements to be designated hedging and are therefore classified in the trading portfolio.

Additionally, the balance includes the valuation of the derivative associated with the transaction Titulización ICO - Pyme, since it cannot be regarded as a hedge following the write-off of securitized loans from the balance sheet. The fair value of this instrument amounts to 6,440 thousand of euros at 31 December 2011 (16,738 thousand of euros at 31 December 2010).

The fair value of these items has been calculated in both 2011 and 2010, taking as a reference, implicit curves in monetary and government debt markets.

The effect on the consolidated income statement for the years ended 31 December 2011 and 2010 of the changes in the fair value of trading portfolio assets and liabilities is a profit of 5,220 thousand of euros and 35,571 thousand of euros, respectively (Note 30).

Set out below is a breakdown, by class of derivative, of the fair value of the Institute's trading derivatives and their notional value (amount on which future payments and collections of these derivatives are based) at 31 December 2011 and 2010:

	Thousands of euros					
	Noti	onal	Asse	ets	Liabilities	
	2011	2010	2011	2010	2011	2010
By type of market Organised markets						
Non – organised markets	6,385,076	8,680,512	451,799	598,423	442,959	552,616
	6,385,076	8,680,512	451,799	598,423	442,959	552,616
By type of product						
Swaps	6,385,076	8,680,512	451,799	598,423	442,959	552,616
	6,385,076	8,680,512	451,799	598,423	442,959	552,616
By counterparty						
Credit institutions	2.010.817	4,258,867	-	16,503	442,959	552,616
Other financial institutions	2.626.252	2,626,252	6,440	16,738	-	-
Other sectors	1,748,007	1,795,393	445,359	565,182		-
	6,385,076	8,680,512	451,799	598,423	442,959	552,616
By type of risk						
Exchange risk	3.486.377	3,774,611	429,249	558,323	420,336	546,666
Interest rate risk	2,898,699	4,905,901	22,550	40,100	22,623	5,950
	6,385,076	8,680,512	451,799	598,423	442,959	552,616

The reasonable value has been calculated in the 100% of the cases in 2011 and 2010, taking the implicit curve of the money markets and the public debt as a reference.

At December 31st, 2011 and 2010 the classification of the trading portfolio, stated at fair value and taking the hierarchical into account as shown in Nota 2.2.3, was as follows:

	Thousands of euros					
	2011			2010		
	Level I	Level II	Level III	Level I	Level II	Level III
Held-for-trading-derivatives assets Held-for-trading-derivatives of	-	451,799	-	-	598,423	-
liabilities	-	442,959	-	-	552,616	-

The following table shows the amounts recognised in the income statements in 2011 and 2010 for changes in the fair value of the Institute's financial instruments included in the trading portfolio related to unrealised gains and losses, distinguishing between financial instruments whose fair values are measured taking quoted prices in active markets (Level 1), those estimated using valuation technique whose inputs are observable (Level 2) and those whose inputs are not based on observable market data (Level 3):

		Thousand of euros				
		2011		2010		
	Gains	Losses	Net	Gains	Losses	Net
Level 1	-	-	-	-	-	-
Level 2	373,638	378,858	(5,220)	576,211	540,640	35,571
Level 3	-	-	-	-	-	-

# 8. AVAILABLE-FOR-SALE FINANCIAL ASSETS

The breakdown of the balance of this chapter of the balance sheet at December 31, 2011 and 2010, investment is as follows:

	Thousands of euros		
	2011	2010	
FONDICO, Fondo de Capital Riesgo (1)	147,085	147,137	
FEI, Fondo Europeo de Inversiones (2)	2,668	2,744	
SWIFT (3)	3	2

Fondo PYMEX Fundación Emp y Crecim (5)	33	150	
Fondo de Carbono Postkyoto (6)	230	7	
SICAV Fondo Marguerite (7)	4,663	85	
FES Infraestructuras (8)	9,650	-	
Fondo Carbono empresas Españolas (9)	1,506	-	
Fixed income portfolio (10)	854,293	1,105,597	
	1,026,712	1,261,385	

The balance of Valuation Adjustment of equity epigraph at December 31, 2011 and 2010 produced by changes in the fair value of the items included under the heading of financial assets available for sale is as follows:

	Thousands o	Thousands of euros		
	2011	2010		
Equity instruments Debt instruments	16,788 8,060	18,931 8,652		
	24,848	27,583		

Movements experienced during the years 2011 and 2010 under the heading of financial assets available for sale are listed below:

	Thousands o	Thousands of euros		
	2011	2010		
Initial balance	1,261,385	1,473,411		
Purchase additions Amortizations and sales Fair value fluctuations movements Impairment losses movements	676,909 (908,229) (2,735) (618)	465,860 (661,430) (15,567) (889)		
Balance at the end of the year	1,026,712	1,261,385		

- (1) Fund formed in May 1993, in which the Institute, the Group's Parent entity, is the sole participant. The book value of the interest held is 147,085 thousand euros at 31 December 2011 (31 December 2010 147,137 thousand euros), fully paid at December 2011 (fully paid at December 2010).
- (2) Interest equivalent to 0.2667% of share capital. An amount of 6,400 thousand euros was outstanding at 31 December 2011 and 2010.

- (3) Institute's shareholding in one action of this entity, as a full member of the same from 2008.
- (4) Fund formed in October 2005 and in which the Institute participates with other public and private entities. The Fund was created to invest in projects developed by Spanish companies in the African Maghreb. The allocations to this fund have a provision coverage of 30% of total real capital (2,292 thousand euros at December 31, 2011 and 1,674 thousand euros at December 31, 2010).
- (5) Fund formed in May 2003 by the Enterprise Foundation and Growth, in collaboration with the BID and Nacional Financiera SNC, which aims at taking stakes in the temporary capital of non-financial firms located in Mexico. The allocations to this fund have a decline of 30% of the total contributions made (77 thousand euros at December 31, 2011 and 77 thousand euros at December 31, 2010).
- (6) Fund formed in September 2007 in which ICO participates with the BEI, KfWand other public financial institutions in Europe, in the market for the C02 emissions beyond 2012.
- (7) Participation in a Luxemburg based Investment Company with Variable Capital (S.I.C.A.V.) (6.67%) that manages the Marguerite Fund. Whit the participation of leading European public financial institutions, this is a European equity fund which seeks to pro mote investment in infrastructure to implement the key policies of the European Union in the fight against climate change, with the aim of combining the principle of return to investors based on market policies and the objectives set by public policy.
- (8) Fund formed in 2011, wholly owned by the ICO and managed by Axis Participaciones Empresariales.
- (9) Fund that began operating in 2011, in which ICO has a 32.68% interest.

These interests are classified as available-for-sale financial assets and measured at fair value based on the underlying value at year-end. Fair value is determined based on the nature of the investment, with the underlying value calculated using the most appropriate valuation technique.

(10) As part of its liquidity management policy, has invested in debt instruments classified as financial assets available for sale. These are fixed income securities issued by Spanish financial institutions, consisting mainly of bonds guaranteed by the State 31 December 2011: 806,393 thousand euros (31 December 2010: 1,100,764 thousand euros) as shown below:

	Thousand of euros 2011	Thousand of euros 2010		
Maturity of 3 months Maturity between 3 and 6 months	84,992 469.886	75,000 34,993		
Maturity between 6 and 9 months Maturity over 9 months	- 251,515	- 990,771		
-	806,393	1,100,764		

At December 31, 2011 and 2010, the classification of financial assets available for sale, stated at fair value and taking the hierarchical level into account as shown in Note 2.2.3., was as follows:

	Thousands of euros						
		2011			2010		
	Level I	Level II	Level III	Level I	Level II	Level III	
Debt securities Other equity instruments	854,293 -	- 172,419	-	1,105,597 -	- 155,788	-	

## 9. CREDIT, LOANS AND DISCOUNTS

The breakdown by type and status, of Investment Credit, loans and discounts at December 31, 2011 and 2010, net value adjustment for impairment of assets, is as follows:

	Thousands of euros	
	2011	2010
By mode and location:		
Commercial credit	-	-
Debtors with mortgage	52,212	73,081
Debtor with other security	1	24,801
Assets temporary acquisitions	229,693	-
Hybrid financial assets	- · · · -	-
Other term debtors	77,474,217	62,997,758
Leases	-	-
Advances on demand and other	1,395,826	1,902,023
Doubtful assets	680,145	997,503
Valuation adjustments	302,664	171,675
	80,134,758	66,166,841

In "Advances on demand and other" epigraph are included, not expired impaired assets, funds provisions to third parties pending to be liquidated and other temporary advances.

The composition of the balance of this chapter of the balance sheet at December 31, 2011 and 2010, classified by type of counterparty, is as follows:

	Thousands of euros	
	2011	2010
By counterparty categories		
Credit institutions (Note 9.1)	49,895,251	43,264,317
Acquisition of assets from counterparties under resale agreements (Note 9.2)	30,269	
Resident public administrations (Note 9.2)	4,779,676	2,299,541
Other resident sectors (Note 9.2)	26,074,087	21,217,194
Other financial assets	10,815	7,807
	80,790,098	66,788,859
(Impairment losses)	(958,004)	(793,693)
Other measurement adjustments (*)	302,664	171,675
	80,134,758	66,166,841

(\*) Measurement adjustments relate to the accrual of interest and similar yields, as well as commission adjustments.

Set out below is the movement for 2011 and 2010 in impairment losses recorded to cover the credit risk and the accumulated amount of such losses at the beginning and end of those years on the portfolio of loans and discounts:

		Thousands	of euros	
	Country risk	Specific provisions	General provision	Total
Balance as at January, 31, 2010 Appropriations charged to income Recoveries Application of funds Other movements Adjustments for exchange differences	7,945 (536) (7,440) 31	458,205 177,905 ( 37,714) ( 46,805) 7,404 2,107	232,591 - - - - - - -	698,741 177,905 ( 38,250) ( 46,805) ( 36) 2,138
Balance as at December, 31 2010		561,102	232,591	793,693
Appropriations charged to income Recoveries Application of funds Other movements Adjustments for exchange differences	- - - -	328,894 (89,490) (71,381) (2,147) (1,565)	- - - - -	328,894 (89,490) (71,381) (2,147) (1,565)
Balance as at December, 31 2011		725,413	232,591	958,004

The general provision is constituted in December 31, 2011 and 2010, 125% respectively of the alpha parameter established for its calculation in Anejo IX of Circular 4/2004, respectively.

The net amount carried in the accompanying income statements for 2011 and 2010 as a result of movements affecting assets whose recovery is deemed remote totals 9,097 thousand euros and 24 thousand euros, respectively.

The heading "Other movements" included in variations for 2011 in the specific provision records amounts reclassified by the Group, taking into account the nature of the transactions covered, broken down mainly as follows:

1. Transfer to liability accounts ("Amounts payable to the Public Treasury") from specific provisions for 2,311 thousand euros related to economic policy loans subject to Law 24/2001.

The heading "Other movements" included in variations for 2010 in the specific provision records amounts reclassified by the Group, taking into account the nature of the transactions covered, broken down mainly as follows:

2. Transfer to "Provisions of non-current assets in sale" of 7,440 thousand euros related with the award of assets covered by credit operations with specific.

Specific provision on the basis of determining criteria breakdown is presented below:

	Thousands of euros	
	2011	2010
Determined:		
Exclusively to customer arrears	511,391	445,488
Other than customer arrears	34,659	50,329
	476,732	395,159
Substandard	214,022	115,614

The substandard specific provision corresponds to credit assets for an amount of 1,526,513 thousand euros at December 31, 2011 (768,582 thousand euros at December 31, 2010).

The movement of financial impaired assets written off to be recovery considered remote is as follows:

	Thousands of euros	
	2011	2010
Initial balance	431,229	329,027
Additions: By remote recoveries By other causes	244,798 194,210 50,588	101,733 58,247 43,486
Recoveries: By refinancing or restructuring By collecting cash without additional funding For asset allocation Others	(9,097) (9,097)	(24)
Definitive write-off: By forgiveness By expiry By other causes	(41,578) - (41,578)	- - - -
Net Exchange fluctuation	3,280	493
Final balance at the year end	628,632	431,229

Set out below is a breakdown of those financial assets classified as credits, loans and discounts and considered to be impaired due to the credit risk at December 2011 and 2010 and those which, although not considered impaired, record some amount which is past due at that date, classified by counterparty and on the basis of time elapsed from the due date of the amount not paid at that date most outstanding on each operation. Impaired assets secured by Central Government are detailed in Note 9.2.

## Impaired assets at December 2011

	Thousands of euros				
	Up to 6 months	Between 6 and 9 months	Between 9 and 12 months	Over 12 months	Total
By counterparty categories					
Other resident and non-resident sectors	645,485			34,660	680,145
	645,485			34,660	680,145

There were no impaired assets relating to country risk at 31 December 2011 and 2010.

## Impaired assets at December 2010

	Thousands of euros				
	Up to 6 months	Between 6 and 9 months	Between 9 and 12 months	Over 12 months	Total
By counterparty categories					
Other resident and non-resident sectors	943,115	467	15,302	38,619	997,503
	943,115	467	15,302	38,619	997,503

The amount of the unimpaired matured assets relating to 2011 and 2010 totals 83,577 thousand euros and 104,549 thousand euros, respectively, and their age in both years is between one and two months.

## 9.1 Deposits at credit institutions

An Analysis of the balances of this caption in the balance sheets as at 31 December 2011 and 2010 is as follows:

	Thousands of euros	
	2011	2010
By nature		
Institute loans to BBVA (Note 9.1.1)	224,221	375,476
Deposits at credit and financial institutions (Note 9.1.2)	1,475,394	545,745
Financing loans for small and medium – sized businesses (Nota 9.1.3)	18,495,296	19,022,298
Other mediation loans (Nota 9.1.2)	29,346,310	23,139,422
Other demand accounts (Nota 9.1.2)	354,030	181,376
Other financial assets	<u> </u>	-
	49,895,251	43,264,317
(Impairment losses)	(73)	-
Other measurement adjustments (*)	197,225	118,098
	50,092,403	43,382,415

(\*) Measurement adjustments relate to the accrual of interest and similar yields, as well as commission adjustments.

#### 9.1.1 Institute loans to BBVA

The breakdown, by product type, of the loans and current accounts granted to BBVA at 31 December 2011 and 2010, as well as the average annual interest charged during those years, is set out below:

	Thousands of euros Average no		Average nominal	interest rate
	2011	2010	2011	2010
Loans - Ordinary financing	224,212	347.705	1.57%	1.05%
Official Export Credit	-	27,762	3.74%	3.77%
Other accounts	9	9	1.57%	1.47%
	224,221	375,476		
Current accounts - Current Accounts and other				
outstanding debits (1)	6,699	8,818		
	230,920	384,294		

(1) Included in "Other demand accounts" under Credit institutions.

Of the total recorded under this heading, the amount denominated in foreign currency at 31 December 2011 and 2010 totalled 16,702 thousand euros and 27,762 thousand euros, respectively.

The interest accrued during 2011 and 2010 for these loans totalled 4,983 thousand euros and 5,590 thousand euros, respectively, which is included under the heading "Interest and similar revenues - credit institutions" in the income statement.

A breakdown of loans by maturity date, excluding restatement adjustments, at 31 December 2011 and 2010 is set out below:

	Thousands of euros	
	2011	2010
Up to 1 year	148,666	152,333
From 1 to 2 years	75,555	148,666
From 2 to 3 years	-	74,477
From 3 to 4 years	-	-
From 4 to 5 years	-	-
More than 5 years	<u> </u>	-
	224,221	375,476

9.1.2 Deposits in credit and financial institutions, other mediation loans and other demand accounts.

At 31 December 2011 and 2010, the headings "Deposits in credit and financial institutions" and "Other mediation loans" accrued interest at 3.38% and 2.64% per year, respectively. Their composition, in terms of nature and currency, at 31 December 2011 and 2010 is set out below.

	Thousands of euros	
	2011	2010
By nature		
Demand deposits	354,030	181,376
Fixed – term deposits	30,821,704	23,685,167
	31,175,734	23,866,543

"Time deposits" grouped by maturity date at 31 December 2011 and 2010 break down as follows:

	Thousands o	of euros
	2011	2010
Up to 1 year	9,382,050	3,891,027
From 1 to 2 years	5,025,682	6,347,389
From 2 to 3 years	4,872,046	3,422,684
From 3 to 4 years	3,363,111	3,040,061
From 4 to 5 years	2,922,622	2,010,250
More than 5 years	5,256,193	4,973,756
	30,821,704	23,685,167

The interest accrued during 2011 and 2010 for these loans have amounted to 918,669 thousand euros and 471,292 thousand euros, respectively, which are included under the heading "Interest and similar income - of credit institutions" of the profit and loss account.

Mediation lines set up in 2011 and 2010 and also included under "Other mediation loans", with an outstanding exposure at 31 December 2011 of 6,645 million euros (5,580 million euros at 31 December 2010), include certain liquidity lines with ICO risk for SMEs. In these lines ICO assumes a general and global risk for default presented by mediator financial entities, up to 5% of the amount of the provisions made for these lines whereas for credit lines granted in 2010 and 2011, the maximum risk assumed is the average default rate for financial entities, excluding real estate transactions. At December 31st, 2010 ICO had set up a provision of 176,836 thousand euros (144,165 thousand euros at December 31, 2010) for this item (Note 20). The provisions made are equal to net interest income generated for the Institute by these lines of mediation. If the provisions were insufficient to cover the defaults, the difference would be charged directly to the RDL Fund 12/95, not generating losses for ICO.

### 9.1.3 Financing loans for small and medium-sized companies

By virtue of the Resolution of the Council of Ministers adopted on 26 February 1993, a line of credit was opened to assist with the financing of small and medium-sized companies (SME). This line is instrumented through loans granted by the Institute to various financial institutions, which formalised the loans with the companies concerned. During successive years this policy continued, and a line of credit in various amounts was approved for each year.

In 2011 and 2010 8,000 and 8,000 million of euros, was approved for each year as a maximum amount, respectively.

The interest accrued during 2011 and 2010 for these loans totalled 533,383 thousand euros and 354,524 thousand euros, respectively, which is included under the heading "Interest and similar revenues - credit institutions" in the income statement.

The breakdown of SME financing loans at 31 December 2010 and 2009, by maturity date, is as follows:

	Thousands o	f euros
	2011	2010
Up to 1 year	5,256,151	4,346,313
From 1 to 2 years	4,018,032	4,206,881
From 2 to 3 years	3,228,609	3,481,764
From 3 to 4 years	2,258,767	2,659,852
From 4 to 5 years	1,293,375	1,776,487
More than 5 years	2,440,362	2,551,001
	18,495,296	19,022,298

In transactions classified as "SME Financing loan s" granted up to 31 December 1997, the ICO, the Group's Parent entity, assumes a percentage of credit risk that the entity receiving the funds holds, in turn, with respect to final borrowers. Since that date the Institute does not assume any risk whatsoever regarding the insolvency of final borrowers.

SME loans at 31 December 2011 and 2010 carried annual interest of 2.80% and 2.03%, respectively.

#### 9.2 Customer loans

The breakdown of this balance sheet heading at 31 December 2011 and 2010, based both on the category of counterparty and the currency concerned, is as follows:

	Thousands of euros	
	2011	2010
By counterparty categories		
Resident Public Administrations	4,779,676	2,299,541
Non-resident Public Administrations	-	-
Acquisition of assets from counterparties under repurchase agreements	30,269	-
Other resident sectors	24,422,632	19,532,750
Other non-resident sectors	1,651,448	1,684,444
Other financial assets	10,822	7,807
	30,894,847	23,524,542
(Impairment losses)	(957,931)	(793,693)
Other measurement adjustments (*)	105,439	53,577
	30,042,355	22,784,426

(\*) Measurement adjustments shown relate to the accrual of interest and similar yields, as well as commission adjustments.

Of the above counterparty balances, below we provide information regarding the transactions secured by the State, set out by counterparty and type of instrument, included under "Other resident sectors" and "Resident Public Administrations", which are classified under the heading Customer loans at 31 December 2011 and 2010:

	Thousands of euros	
	2011	2010
Balances included under "Resident Public Administrations"		
Loans to the national government	498,813	162,303
Loans to regional governments	4,280,863	2,137,238
Measurement adjustments	10,274	3,092
	4,789,950	2,302,633
Balances included under "Other resident sectors"		
Doubtful assets secured by the State	54,569	376,207
Loans to other public entities	4,834,246	5,205,500
Loans to other sectors guaranteed by the State	1,724,856	936,275
	6,613,671	6,517,982
Total transactions secured by the State	11,403,621	8,820,615

The breakdown of "Loans to the National government", without any measurement adjustment, is as follows at 31 December 2011 and 2010:

	Thousands of euros		
	2011	2010	
Loans to the State and its Autonomous Entities Accounts receivable from the Public Treasury Other accounts receivable from the State	428,842 61,136 8,835	650 154,575 7,078	
	498,813	162,303	

The heading "Accounts receivable from the Public Treasury" records the amounts paid by the Group to the Public Treasury that have yet to be effectively repaid as Subsidies receivable to offset interest rate differences affecting mediation loans.

The heading "Other accounts receivable from the State" records the Institute's CARI operations amounts.

The balances of these amounts, which are carried at their nominal value, do not bear any interest whatsoever.

The breakdown of the contribution by public sector entity to net interest income in the income statements for 2011 and 2010 (Notes 25 and 26) is as follows:

	Thousand of euros		
	2011	2010	
Central government	(77,417)	(92,626)	
Regional governments	63,954	30,040	
Other public sector entities	157,833	99,010	
	144,370	36,424	

The breakdown of the principal amounts of loans included under the heading "Customer loans", including measurement adjustments, and set out by maturity date at 31 December 2011 and 2010, is as follows:

	Thousands of euros		
	2011	2010	
By maturity			
Up to 3 months	730,133	500,172	
From 3 months to 1 year	2,928,537	1,993,877	
From 1 to 5 years	13,942,865	9,399,622	
More than 5 years	13,398,751	11,684,448	
Indeterminate maturity	<u> </u>	-	
	31,000,286	23,578,119	

In accordance with current Bank of Spain regulations, the provision for signature risk insolvency is recorded under the heading "Provisions for liabilities and charges - Other provisions" in the consolidated balance sheet.

Loans and advances to other debtors at 31 December 2011 and 2010 carried annual interest of 2.53% and 1.80%, respectively.

## 10. HELD-TO-MATURITY INVESTMENT PORTFOLIO

The breakdown by counterparty of the held-to-maturity investment portfolio at 31 December 2011 and 2010 is as follows:

	Thousands of euros		
	2011	2010	
By counterparty			
Spanish public administrations	3,563,166	-	
Resident credit institutions	2,821,300	1,928,603	
Other resident sectors	1,028,206	2,363,576	
	7,412,672	4,292,179	
Value adjustments for impairment	<u> </u>	-	
	7,412,672	4,292,179	

The average rate of compensation for the portfolio was 2.43% regardless of coverage, and 2.38% with them (1.70% and 1.53% respectively at December 31, 2010).

The heading "Resident Credit Institutions" include debt securities issued by Spanish financial institutions, which are managed in an active market, have a fixed maturity and its cash flows have determined or determinable amount in which the Institute has, from the outset and at any later date, the positive intention and financial capacity to keep until maturity.

On May 8, 2007, ICO transferred assets in a securitization on receivables from loans that ICO had granted to financial institutions through its lines of mediation since 2001 amounting to 14,099,000,000 euros.

The assets were securitized through the establishment of a securitization fund called "ICO-MEDIACIÓN AyT, FTA". The assets in this fund were composed of credit rights assigned to serve them as a guarantee for the bond issue amounting to 13,169,000,000 euros and the other liability elements of the fund which essentially include subordinated loans amounting to 930,470,000 euros whose payment priority is behind that of the aforementioned bonds which have been signed by other financial institutions.

The bond issue was fully subscribed by the Institute having been placed in the investment portfolio at December 31, 2011 and 2010. The Fund was accepted to trading on the AAIAF Bond Market and given an AAA credit rating by FITCH.

According to the criteria contained in the Note 2.2.2 and the terms of article 23 of Bank of Spain Circular 4/2004, in this transaction the risks and benefits associated with ownership of the receivables were transferred to other parties substantially, through the subordinated loans, so a proceed of taking out of the balance loans that could be securitizated.

Additionally along with the securitization the Institute contracted an interest rate swap that is classified in the trading book balance sheet on December 31, 2011 and 2010 (Note 7).

The heading "Other resident sectors" mainly includes the bonds issued by the Fund "ICO - Mediación AyT, FTA" being the outstanding balance at 31 December 2011 1,028,206 thousand euros (2,363,576 thousand euros at 31 December 2010).

The contribution of interest to the consolidated income statement in 2011 and 2010 totalled 21,185 thousand euros and 23,525 thousand euros, respectively (Note 25).

ICO has not earmarked any amount to hedge impairment losses due to credit risk attributed to securities included in the held-to-maturity investment portfolio at 31 December 2011 and 2010.

Movements experienced during the years 2011 and 2010 under the heading of Held-to-maturity investment portfolio are shown below:

	Thousands of euros		
	2011	2010	
Initial balance	4,292,179	7,828,332	
Purchase additions Derecognition from recovery of funds Written off for default Amortization and depreciation	29,438,794 - - (26,318,301)	8,507,416 (18,558) (11,442) (12,010,049)	
Balance at the end of the year	7,412,672	4,292,179	

Movement of impairment losses recorded in the held-to-maturity investment portfolio at the end of the years 2011 and 2010 is shown below:

	Thousands of euros
Balance as at January, 1 2010	30,000
Appropriations charged to income Recoveries Application of funds Other movements Adjustments for exchange differences	(18,558) (11,442) -
Balance as at December, 31 2010	
Appropriations charged to income Recoveries Recoveries Application of funds Other movements Adjustments for exchange differences	
Balance as at December, 31 2011	<u> </u>

In 2010, an investment classified in this portfolio was written. A partial recovery of 18,558 thousand euros of the loan was received. This amount was recognised under "Impairment of financial assets – Financial instruments not measured at fair value through profit and loss" in the income statement.

The breakdown by term residual maturity of December 31, 2011 and 2010 is as follows:

2011	2010
-	-
3,971,514	1,928,603
274,374	-
3,166,784	2,363,576
-	-
7,412,672	4,292,179
	-

### 11. HEDGING DERIVATIVES (DEBTORS AND CREDITORS)

This caption in the accompanying balance sheet records the hedging instruments carried at fair value in accordance with the explanation provided in Note 2.3.

The derivatives contracted and the hedged items were fundamentally the following:

- Interest-rate swaps, which hedge financial instruments remunerated at a rate other than the Euribor.
- Exchange hedges, which cover changes in fair value and cash flows relating to several financial instruments.

The measurement methods used to determine the fair value of derivatives have been the discountedcash-flow method to measure interest rate derivatives and exchange risk derivatives.

The notional and net fair values of financial derivatives recorded as "Hedging derivatives" at 31 December 2011 and 2010 are set out below by counterparty, remaining term and risk, are as follows:

	Thousands of euros					
	Notional		Assets		Liabilities	
	2011	2010	2011	2010	2011	2010
By type of market Organised markets						
Non-organised markets	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
<b>By type of product</b> Swaps	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
<b>By counterparty</b> Credit institutions Other financial institutions Other sectors	69,936,789 - -	71,364,003 - -	5,206,759 - -	4,768,558 - -	670,691 - -	1,400,175 - -
	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
<b>By type of risk</b> Exchange risk Interest rate risk	12,326,099 57,610,690	19,801,322 51,562,681	3,838,216 1,368,543	3,338,616 1,429,942	487,556 183,135	1,015,974 384,201
	69,936,789	71,364,003	5,206,759	4,768,558	670,691	1,400,175
						76

On December 31, 2011 and 2010, the classification of hedging derivatives, measured at fair value and taking into account the hierarchical level set out in Note 2.2.3., was as follows:

	Thousands of euros					
	2011			2010		
	Level I	Level II	Level III	Level I	Level II	Level III
Held-for-trading-derivatives assets Held-for-trading-derivatives of	-	5,206,759	-	-	4,768,558	-
liabilities	-	670,691	-	-	1,400,175	-

## 12. NON-CURRENT ASSETS FOR SALE

The entire balance in the heading "Non-current assets for sale" relates to assets awarded in foreclosure.

Movements between 31 December 2010 and 31 December 2011 in the balances under this balance sheet heading are shown below:

	Thousand of euros		
	Cost	Impairment	Total
Balance as at January 1, 2010	62,738	(58,406)	4,332
Additions Disposals / Applications Transfers	(2,387)	(1,100) - 747	(1,100) (2,387) 747
Balance as at December 31, 2010	60,351	(58,759)	1,592
Additions Disposals / Applications Transfers	260 (7,530)	(95) 7,273 651	165 (257) 651
Balance as at December 31, 2011	53,081	(50,930)	2,151

Of the total amount of "Non-current assets held for sale" at 31 December 2011 and 2010, 48,678 thousand euros corresponds to a single asset, which is fully provisioned.

## 13. SHAREHOLDINGS

The balance of this consolidated balance sheet heading at 31 December 2011 and 2010, set out by company and shareholding, is as follows:

	Thousands of euro	
	Associates Entities	
Balance at 31 December 2009	40,090	
Additions Disposals/ Applications Others movements	31,062	
Impairment	(4,079)	
Balance at 31 December 2010	67,073	
Additions Disposals/ Applications	13,265	
Others movements Additions	(45,664) 14,870	
Balance at 31 December 2011	49,544	

Appendix I contains a breakdown of shareholdings, as well as the most relevant information regarding these interests at 31 December 2011 and 2010.

Additions in 2011 relate to the capital increase carried out by an ICO investee and to consolidation adjustments. The main additions in 2010 related to the acquisition of interests in the Economic Interest Groupings listed in Appendix 1, for 22,124 thousand euros, classified as associates under "Investments".

The return on the aforementioned shareholdings is tax related due to the inclusion in the Group's Parent entity's tax base of the relevant tax losses of these companies. The annual impairment charge is calculated such that the tax profit obtained in the year is adjusted to the expected final results of the investment.

At December 31, 2010 an amount of 4,079 thousand euros was recognized in respect of impairment by charge to corporate income tax in the accompanying consolidated income statement.

Other movements in 2011 include the transfer of the amount of interests in these Economic Interest Groupings (45,664 thousand euros) following their reclassification to "Loans and receivables" in the balance sheet, as this better represents the actual content of the investment (guaranteed return structures). As a result of the reclassification, the provision for impairment was reclassified to "Other provisions", for 14,870 thousand euros (see Note 20).

## 14. PROPERTY, PLANT AND EQUIPMENT

Movements in 2011 and 2010 recorded under property, plant and equipment, and accumulated depreciation, are as follows:

	Thousands of euros			
	Building of own use	Furniture, vehicles and another fixed assets	Real-estate investments	Total
Cost				
Balance as at January 1, 2011 Additions	112,462 156	15,908 206	-	128,370 362
Disposals and other write-offs	(1)	(334)	<u> </u>	(335)
Balance as at December 31, 2011	112,617	15,780	<u>-</u>	128,397
Accumulated depreciation Balance as at January, 1 2011 Appropriations Transfers and other movements	17,874 2,203 	7,093 361 (110)	- - -	24,967 2,564 (110)
Balance as at December 31, 2011	20,077	7,344	<u> </u>	27,421
Impairment losses December 31,2010		651		651
Property, plant and equipment net Balance as at December 31, 2011	92,540	7,785	<u> </u>	100,325
Cost				
<b>Balance as at January 1, 2010</b> Additions Disposals and other write-offs	111,686 776	16,904 163 (1,159)	-	128,590 939 (1,159)
Balance as at December 31, 2010	112,462	15,908	<u> </u>	128,370
Accumulated depreciation Balance as at January, 1 2010 Appropriations Transfers and other movements	16,009 2,186 (321)	6,969 492 (368)	- - -	22,978 2,678 (689)
Balance as at December 31, 2010	17,874	7,093		24,967
Impairment losses December 31,2010	<u>-</u>		<u> </u>	
Property, plant and equipment net Balance as at December 31, 2010	94,588	8,815		103,403

At 31 December 2011 there are fully-depreciated property, plant and equipment for own use for a gross amount of approximately 12,711 thousand euros (6,187 thousand euros at 31 December 2010).

In compliance with the Group policy, all property, plant and equipment is insured at 31 December 2011 and 2010.

Transitional Provision One, section B).6 of Bank of Spain Circular 4/2004, allows any asset recorded under Property, plant and equipment to be carried at its fair value. To implement this measurement adjustment, the Group carried out the relevant appraisals of property used in operations, which allowed the value of the Group's property, plant and equipment to be increased by 53,106 thousand euros. A restatement reserve was recorded for the resulting capital gain, net of the tax effect. The restated book value will be applied as an attributed cost at that date.

The revaluation reserve at December 31, 2011 amounted to 28,144 thousand euros (29,054 thousand euros at December 31, 2010) (Note 22).

The table below presents the fair value of certain items of property, plant and equipment at December 31, 2011 and 2010 by category into which they are classified, along with the related carrying amounts at those dates:

		Thousand	s of euros	
	2011	2011		10
	Carrying amount	Fair value	Carrying amount	Fair value
Property, plant and equipment for own use	100,325	120,581	103,403	115,442
Buildings	92,540	113,363	94,588	107,222
Other	7,785	7,785	8,815	8,815
Investment property	-	-	-	-
Property under construction	-	-	-	-

The fair value of property, plant and equipment in the preceding table was estimated as follows:

- For assets for which an updated appraisal by a Bank of Spain-approved valuer is not available, fair value was determined based on estimates made by the entity using market data relating to trends in prices of similar assets.
- For assets for which an updated appraisal by a Bank of Spain-approved valuer is available, fair value was determined based on the appraisal as provided for in Ministerial Order 805/2003. Information on the valuers performing the appraisals and on the fair value estimated in accordance with the procedure described is as follows:

All properties for own use were appraised by Gestión de Valoraciones y Tasaciones, S.A. (GESVALT) using the comparison approach (M), at 31 December 2011 and 2010.

## 15. INTANGIBLE ASSETS

The breakdown of Intangible assets in the balance sheet at 31 December 2011 and 2010 relates solely to other intangible assets.

		Thousands	of euros
	Useful estimated life	2011	2010
With indefinite useful life With defined useful life	- 3 years to 10 years	- 22,631	- 19,825
Gross total	- , , , ,	22,631	19,825
Of which: Internal developments Remainder	3 years 10 years	19,179 3,452	16,661 3,164
Accumulated depreciation Impairment losses		(9,758) (2,137)	(5,383)
		10,736	14,442

All intangible assets at 31 December 2011 and 2010 related to computer software. Fully amortised intangible assets at 31 December 2011 amounted to 1,242 thousand euros (2,139 at 31 December 2010).

## 16. TAX ASSETS AND LIABILITIES

The breakdown of tax assets and liabilities at 31 December 2011 and 2010 is as follows:

	Thousands of euros			
	Asse	ts	Liabilities	
	2011	2010	2011	2010
Current taxes:	2,154	397	1,668	21,806

Restatement of property	-	-	-	-
Restatement of available -for- sale financial assets	-	-	(1,173)	(6,671)
Accrual financial liabilities	-	-	-	(1,244)
Accrual of financial commissions	-	-	-	-
Reinvestment deferral		-	(56)	(101)
Balance at the end of the year	163,968	164,263	105,577	77,384

## 17. OTHER ASSETS

The breakdown of Other Assets at 31 December 2011 and 2010 is as follows:

	Thousands of euros	
	2011	2010
Others assets Accruals	1,203 1,354	1,005 2,616
	2,557	3,621

## 18. OTHER LIABILITIES

The breakdown of Other Assets at 31 December 2011 and 2010 is as follows:

	Thousands of euros		
	2011	2010	
Others assets Accruals	1,107 3,435	990 2,066	
	4,542	3,056	

"Other liabilities" basically corresponds to various payment obligations in connection with the transfer of assets and liabilities from the now dissolved Argentaria to BBVA (see Note 1.4).

## 19. FINANCIAL LIABILITIES AT AMORTISED COST

The items that make up the balances recorded under this balance sheet heading are as follows:

	Thousands of euros		
	2011	2010	
By counterparty categories			
Deposits from Central Banks (Note 19.1)	375,126	400,000	
Credit institution deposits (Note 19.2)	4,333,080	3,082,192	
Customer deposits (Note 19.3)	11,334,294	7,020,840	
Debts represented by negotiable securities (Note 19.4)	69,112,721	57,693,775	
Other financial liabilities (Note 19.7)	4,096,855	4,002,331	
	89,252,076	72,199,138	

## 19.1 Deposits from central banks - liabilities

The composition of this balance sheet heading at 31 December 2011 and 2010, set out by currency and the nature of the transaction, is as follows:

	Thousands of euros		
	2011	2010	
By type of transaction: Repurchase agreements with the ECB	375,126	400 000	
	375,126	400 000	

## 19.2 Credit institution deposits

The composition of this balance sheet heading at 31 December 2011 and 2010, set out by currency and the nature of the transaction, is as follows:

	Thousands of euros		
	2011	2010	
By nature:			
Loans from the European Investment Bank	2,052,271	1,197,851	
Inter – bank loans	1,636,851	1,092,360	
Loans from other financial institutions	486,089	506,850	
Assets sold under repurchase agreements	26,020	-	
Other accounts	65	168,427	
Measurement adjustments – Accrual accounts	131,784	116,704	
	4,333,080	3,082,192	

Interbank deposits fall due within one year as from 31 December 2011 and 2010, respectively.

The "Loans from the European Investment Bank" have the following final repayment schedule.

	Thousands of euros	
	2011	2010
Up to 1 year	40,641	44,605
From 1 to 2 years	47,153	44,277
From 2 to 3 years	25,130	38,780
From 3 to 4 years	52,187	16,307
From 4 to 5 years	104,000	13,398
More than 5 years	1,783,160	1,040,484
	2,052,271	1,197,851

The breakdown by maturity date of "Loans from other financial institutions" is as follows:

	Thousands of euros	
	2011	2010
Up to 1 year	<u>-</u>	30,020
From 1 to 2 years	-	5,976
From 2 to 3 years	304,035	73,674
From 3 to 4 years	182,054	7,899
From 4 to 5 years	, _	83,379
More than 5 years	<u> </u>	305,902
	486,089	506,850

## 19.3 Customer funds

The composition of this heading in the consolidated balance sheets at 31 December 2011 and 2010, according to sector and currency, is as follows:

	Thousands of euros	
	2011	2010
By counterparty category		
Public Administrations	3,234,146	3,777,666
Assets sold under repurchase agreements	279,170	-
Other resident sector (1)	7,797,157	3,219,351
Other non – resident sectors	1,666	14,296
Measurement adjustments – Accrual accounts	22,155	9,527
	11,334,294	7,020,840

(1) Of which at 31 December 2011 and 2010 7,521,045 thousand euros and 2,945,156 thousand euros, respectively, relate to demand.

At 31 December 2011 and 2010, the breakdown by nature of the balance recorded under "Public Administrations" is as follows:

	Thousands of euros	
	2011	2010
Special loan from the State	2	2
Reciprocal Interest Adjustment Agreement (RIAA)	21,873	18,076
Public Administration Current Accounts and other items	504,522	325,257
Special loan Liquidity Line	2,707,749	3,434,331
	3,234,146	3,777,666

With the formalization of liquidity lines mediation ICO 2009, the State subscribed with ICO a special loan to finance the 50% of these lines of mediation to a maximum of 5,000,000 thousand euros. On December 31, 2011 the amount of the loan is 2,707,749 thousand euros (3,434,331 thousand euros at December 2010).

On 30 July 2010, the Institute carried out another asset transfer in the form of a securitisation of credit rights from loans granted to financial institutions through its 2007-2010 mediation line for 22,868,713 thousand euros.

This securitisation was carried out through the creation of the "ICO-MEDIACIÓN AyT, FTA II" securitisation fund (the "Securitisation Fund"). The Securitisation Fund's assets comprised assigned credit rights, which were used as guarantee of a 14,864,700 thousand euros bond issue and of the fund's remaining liabilities and, mainly, includes a subordinated loan for 8,004,013 thousand euros, whose payment rank is below previous bonds, and which was equally subscribed by ICO. This bond issue was fully subscribed by the Institute.It was admitted to trading on the AIAF Fixed-income Market and rated AAA by FITCH.

According to the criteria described in Note 2.2.2 and in Rule 23 of Bank of Spain Circular 4/2004, the risk and rewards incidental to ownership of the assigned credit rights have not been transferred substantially to third parties because of ICO's subscription of the subordinated loan. Therefore, securitised loans are not derecognised from the balance sheet.

In addition, the Institute arranged an interest rate swap with the Securitisation Fund as a cash flow hedge.

As a result, "Other resident sectors" in "Loans and advances to other debtors" on the liability side of the balance sheet includes, under "Issues of equity instruments" a value of zero, which is the result of netting the amount of cash received (17,022,077 thousand euros) and the amount of equity instruments issued for the securities received in exchange (9,018,064 thousand euros) plus the amount of the subordinated loan subscribed in the transaction (8,004,013 thousand euros).

In October 2011, the Securitisation Fund of this transaction gave effect to the credit facility granted by ICO under the related terms. As a result, the 5,000 million euros amount of the loan was recognised under "Loans and receivables" under assets with a debit to "Deposits from other creditors" under liabilities as the amount was debited to a current account held by the Fund at ICO.

#### 19.4 Debts represented by negotiable securities

The breakdown of the heading "Debts represented by negotiable securities" at 31 December 2011 and 2010 is set out below:

	Thousands of euros	
	2011	2010
Promissory notes and other securities (Note 19.5)		25,905
Bonds and debentures issued (Note 19.6).	65,595,975	55,081,619
Valuation adjustments (including transaction costs)	3,516,746	2,586,251
	69,112,721	57,693,775

Movements experienced during the years 2011 and 2010 under the heading of debt securities - notes are as follows:

	Thousands of euros	
	2011	2010
Balance at beginning of the year	25,905	53,281
Issues Amortizations and depreciations	(25,905)	(27,376)
Balance at the end of the year	<u> </u>	25,905

Movements experienced during the years 2011 and 2010 under the heading of debt securities -Bonds and obligations are shown below:

	Thousands of euros	
	2011	2010
Balance at beginning of the year	55,081,619	42,900,879
Issues Amortizations and depreciations	42,171,489 (31,657,133)	28,119,382 (15,938,642)
Balance at the end of the year	65,595,975	55,081,619

#### 19.5 Promissory notes and other securities

The breakdown of the heading "Promissory notes and other securities", based on the nominal amount of the securities and their amortization periods, is set out below at 31 December 2011 and 2010.

	Thousand o	Thousand of euros	
	2011	2010	
Up 1 year From 1 to 2 years From 2 to 3 years From 3 to 4 years		25 905 - -	
From 4 to 5 years More than 5 years	- 		
	<u> </u>	25 905	

The financial cost of the promissory notes and other securities in 2011 and 2010 totalled 7,048 thousand euros and 46,905 thousand euros, respectively, and are recorded under the heading "Interest and similar charges for deposits represented by negotiable securities" (Note 26) in the income statement.

The average weighted interest rate on active promissory notes at 31 December 2011 (all issued between 1989 and 1993) and 2010 was 10.70% and 11.63%, respectively, excluding hedges obtained. Taking hedges into consideration the average rates in 2011 and 2010 fall to 6.86% and 7.57%, respectively.

#### 19.6 Bonds and debentures issued

Set out below are the main characteristics of the debenture issues outstanding at 31 December 2011 and 2010, grouped together by currency together with the relevant interest rates and maximum redemption dates:

Number o	of issues				Thousands	s of Euros
2011	2010	Currency	Redemption date	Annual interest rate	2011	2010
15	16	Norwegian crone	Until2016	4.28 to 6.61	1,014,378	1,201,923
-	1	Swedish crone	Until2016	4.5	-	55,769
6	13	Australian dollar	Until2014	0.055 to 13.5	1,178,967	2,279,598
2	4	Canada dollar	Until2020	3.32 to 5.00	491,865	1,013,361
-	2	Brazilian Real	Until 2011	Various	-	33,819
1	2	New Zeeland dollar	Until2015	6.375	89,622	182,539
40	66	US dollar	Until2018	Various	7,641,851	12,633,165
222	136	Euro	Until2026	Various	48,820,560	30,263,653
13	19	Swiss franc	Until2024	Unti12,00	1,826,928	1,966,758
16	27	British pound	Until2013	0.0475 to 5.00	2,422,617	3,625,996
1	4	Turkish lira	Until 2011	10.00 to 10.50	41,242	145,338
16	14	Yen	Until2023	Various	2,067,945	1,679,700
					65,595,975	55,081,619

A breakdown of each issue may be consulted on the Institute's webpage (www.ico.es) in "Investments - Issues of reference".

In 2011 and 2010 the total financial cost of debenture loans in both euros and foreign currency recorded under the heading "Interest and similar charges for debenture loans and other negotiable securities" in the income statement was 2,275,412 thousand euros, which is an annual average interest rate of 2.63%. In 2010 financial costs totalled 1,746,370 thousand euros, which was an average annual interest rate of 3.56% (Note 26).

The above interest rates do not take into account the effect of hedges obtained. If hedges are taken into account the above-mentioned rates decline to 2.55% in 2011 and to 1.54% in 2010, respectively.

## **19.7** Other financial liabilities

An analysis of the balances of this caption in the consolidated balance sheets as at 31 December 2011 and 2010 is as follows

	Thousands of euros	
	2011	2010
Grants	5,661	8,311
Treasury Funds	3,971,214	3,876,367
Other items	119,980	117,653
	4,096,855	4,002,331

At 31 December 2011 "Other items" mainly include, an amount of 1,120 thousand euros corresponding to operations of outstanding compensation in connection with the operation of ICO PYME securitisation (at December 31, 2010 an amount of 2,560 thousand euros), an amount of 8,627 thousand euros from a refinancing of economic policy (at December 31, 2010 an amount of 13,767 thousand euros), an amount of 8,349 thousand euros from recuperations of pending operations of capitalize as it said in the DA 11 <sup>a</sup> of the Law 24/2001 (at December 31, 2010 an amount of 8,526 thousand euros), an amount of 14,223 thousand euros from timing of financial guarantees (at December 31, 2010 an amount of 14,797 thousand euros) and an amount of 73,838 thousand euros as an advanced received for the operation of Jeremie Fund (at December 31, 2010 an amount of 70,774 thousand euros).

Treasury Funds record those funds received by the Institute, the Group's Parent entity, and repayable in accordance with legislation applicable to each:

- FOMIT Renove Turismo: fund for the upgrade of tourism infrastructure.
- Avanza: fund for access to new technologiesPréstamos Renta Universidad:fund for access to university studies.
- DGT Carnet de conducir: fund for access to a driver's license.
- Plan Vive: renewal of Spain's automobile fleet.
- Linea Future: fund for sustainable projects in the tourism sector.

Detailed information on the lines associated with each of these funds can be found on the Institute website <u>www.ico.es</u>.

The funds associated with the most important lines are:

- Línea FOMIT Turismo (FOMIT Tourism line): this line is to provide financial support to projects aimed to renovation and modernization of infrastructure and tourist destinations.
- Línea Avanzada (Advanced line): this line with the ICO supports and funds the access of citizens and companies to new information technologies (broadband and technological support needed for it). Is implemented, depending on their target, in TIC loans (small and medium enterprises) young people and university students loans (specific group) and digital citizenship loan (citizens in general).
- Línea Préstamos Renta Universidad: this line is to guarantee a future income for postgraduate studies as a Doctorate or a Master degree for 2010-2011.
- Línea Plan Vive: is destinated to make easier to change vehicles with more than 15 years for new ones more efficient.
- Linea Future: This line is to provide incentives for projects in support of sustainable tourism, helping to reorientate current tourist activity with a view to sustainability and ecological efficiency, taking into account variables related to the environment and sustainable development, in order consolidate the position of Spanish tourism at the vanguard of the rational use of energy, the use of renewable energies, the reduction of the water footprint, and waste management.

Unlike other Institute lines, which are funded through market fundraising by the ICO, the financial funds designated to these operations are provided directly by the state, being instrumented through Institute's opened accounts on behalf of the correspondent Ministries. These funds balance, corresponds to the amount provided by formal transactions that are also listed under the heading of Credit, loans and discounts (net amounts, less unamortized willing), so that amount plus the balance of the associated current account (which reflects the balance of the above lines) is always equal to the amount received by the Institute for the provisioning of the line.

The balance of those funds at 31 December 2011 and 2010 is set out below:

	Thousands of euros	
	2011	2010
FOMIT	763,629	804,959
Avanza	1,591,925	1,612,905
Préstamos Renta Universidad	218,529	189,214
Plan Vive	870,467	862,564
DGT Carnet de conducer	6,284	12,678

	3,971,214	3,876,367

## 20. PROVISIONS

At 31 December 2011 and 2010 the breakdown of the balances recorded under this heading in the accompanying balance sheet is as follows:

	Thousands of euros	
	2011	
Provisions for pensions and similar obligations Provisions for contingent exposures and commitments Other provisions	173 27,057 386,829	95 26,614 349,065
	414,059	375,774

## Provisions for contingent exposures and commitments

This heading includes the amount of provisions created to cover contingent risks, which are understood to be those transactions in which the Institute guarantees the obligations of a third party as a result of financial guarantees granted or other agreements, and contingent commitments, which are understood to be irrevocable commitments that could give rise to the recognition of financial assets (Note 24).

## Other provisions

An analysis of the balances of this caption in the balance sheets as at 31 December 2011 and 2010 is as follows:

	Thousands of euros	
	2011	2010
Provision for SMB (Note 9.1.3)		
Royal Decree – Law 12/1995 Fund	- 139,144	- 134,812
Provision for other mediation loans (Nota 9.1.2)		
Provision for Special Loan Liquidity Line	176.836	144.165
Other specific provisions – CARI Egypt	422	474
Fund for amounts recovered from BBVA	500	500
Fund Línea Prestige	12,413	13,286
Fund to compensate AIE shareholdings results	53,265	33,413
Contingency fund	1,846	20,000
Other funds	2,403	2 415
	386,829	349,065

## Royal Decree- Law 12/1995 (28 December)

Royal Decree- Law 12/1995 (28 December), published in the Official State Gazette (BOE) on 30 December 1995 and taking effect on 1 January 1996, it is stipulated that Instituto Oficial de Credito would create, by charging the resources obtained from the State Loan referred to by Section 4.1 of the Council of Ministers Resolution (11 December 1987), a Fund totalling a maximum of 150,253 thousand euros to provide provisions and charge the amounts relating to doubtful and default loans that could arise in the future from the activities listed in Note 1, in accordance with the regulations in force for credit institutions. Additional Provision 4 of Law 66/1997 (30 December) on Tax, Administrative and Social Order Measures stipulated that notwithstanding the application of these regulations, the Council of Ministers or the CDGAE could authorize the ICO to charge the Special provision Fund established under RDL 12/95 for any defaults arising during the course of its business, provided that they did not receive any specific coverage in the General State Budgets. This Fund was created in 1996 under the heading "Other Provisions".

Those loans or transactions that, in view of the relevant terms and conditions, require the application of this Fund are provided for by charge to the same. The Institute's income statement is therefore not affected.

Since they are already provided for through this Fund, the loans covered by the same are not therefore included in the calculation of the general and specific bad debt provision.

The Fund was created as explained in the preceding paragraph and was credited, in addition to the initial allocation, with future allocations that the Instituto Oficial de Crédito makes out of profits obtained and any made or authorized by the State when assuming or offsetting losses, or through any other appropriate system. Similarly, the Fund is credited with the amounts of an recoveries obtained from loans for which provisions have been recorded or any that have been declared to be in default and charged against the fund, that in 2011 and 2010 amounted to 1,294 thousand euros and 1,008 thousand euros, respectively and the income obtained on the management of the funds assigned to the Fund itself, in 2011 and 2010, amounted to 1,408 thousand euros and 3,104 thousand euros, respectively.

In accordance with the provisions of Law 12/1996 (30 December) on the General State Budget, in 1997 an additional 150,253 thousand euros was allocated to this Fund by charging the Ordinary State Loan.

In 2004 another allocation totalling 249,500 thousand euros was charged against the State Loan granted to ICO in accordance with the Council of Ministers Resolution dated 30 July 2004 and no further allocations have been made since then.

In 2011 allocations were made for 4,743 thousand euros directly by the State online mediation Forum Afinsa, by agreement of the Council of Ministers of April 27<sup>h</sup>, 2007, with any other additional endowment (11,952 thousand euros in 2010).

At 31 December 2011 and 2010, the balance of this Fund totals 139,144 thousand euros and 134,812 thousand euros, respectively.

Movements in 2011 and 2010 in this fund recorded under "Other Provisions" in the balance sheet at 31 December 2011 and 2010 are as follows:

	Thousands of euros
Balance as at January 1, 2010	132,427
Capitalisation of interest Loan recoveries (principal and interest) Applications	1,408 1,008 (11,983)
Balance as at December 31, 2010	134,812
Capitalisation of interest Contributions by the State Loan recoveries (principal and interest) Applications	4,882 4,743 1,294 (6,587)
Balance as at December 31, 2011	139,144

## Other provisions CARI-Egypt

The heading "Other provisions CARI-Egypt" records the present value of the Institute's, the Group's Parent entity, commitments with BBVA, deriving from an old official credit export operation involving Egypt.

## Funds recovered from BBVA

Additional provision Eleven of Law 24/2001 (27 December) on Tax, Administrative and Social Order Measures, was applied by the Institute, the Group's Parent entity, in 2001 and 2002, with respect to the heading "Funds recovered from BBVA", to allocate part of its equity to cancel an amount owed to the Institute by the State as a result of certain loans and guarantees granted by the former Official Credit Institutions and secured by the State.

Nonetheless, the management of the transactions affected by the cancellation process has meant that ICO continues to receive collections pertaining to these loans, which for prudence, are not generally reflected as income in the income statement. For those recorded as income, the relevant provision for liabilities has been recorded amounting to 500 thousand euros and 500 thousand euros at 31 December 2011 and 2010, respectively, that will be capitalized in accordance with Additional Provision 10.1 of Law 24/2001, amended by Law 42/2006.

## Prestige Line fund

The Prestige Line Fund has its origins in the RDL 7 / 2002, November 22, which authorizes to charge on Fund Special Provision 12/95 RDL the default amounts from loans Prestige line, with credit to this fund specific provision.

## Fund to compensate AIE shareholdings results

Heading Fund to compensate AIE shareholdings includes the provision to adjust to its profit the transactions performance conducted through the Economic Interest Groupings (Note 13). This provision has been recognized under the rubric of corporate income tax of the income account for an amount of 4,982 thousand euros and 5.829 thousand euros, respectively in the years 2011 and 2010 (Note 23). In addition, in 2011 the interests in Economic Interest Groupings were reclassified from "Investments" to "Loans and receivables" in the balance sheet, with the related impairment provisions transferred to "Other provisions".

## Contingency fund

This heading was created in 2011 and includes a generic provision for general contingencies (including operational risk), amounting to 1,846 thousand euros as of December 31, 2011 (20,000 thousand euros as of December 31, 2010).

Movements in 2011 and 2010 in the provisions recorded under these balance sheet headings at 31 December 2011 and 2010:

		Т	housands of Euros	6	
	Provisions for taxes	Fund for pension	Provisions for contingent exposures and commitments	Other provisions	Total
Balance as at December 31,2009	-	78	26,783	223,341	250,202
Net allocation (1) Recoveries Application of funds Transfers and other movements Exchange differences	- - - - -	17 - - - -	(169)	227,325 (8) (118,630) 16,967 70	227,342 (177) (118,630) 16,967 70
Balance as at December 31,2010		95	26,614	349,065	375,774
Net allocation (1) Recoveries Application of funds Transfers and other movements (2) Exchange differences	- - - -	78 - - -	3,649 (3,250) - 44	158,885 (18,165) (122,756) 19,852 (52)	162,612 (21,415) (122,756) 19,896 (52)
Balance as at December 31,2011		173	27,057	386,829	414,059

- (1) Net charges to profit and loss recognized under "Other provisions" include amounts of 4,882 thousand euros in 2011 and 1,408 thousand euros in 2010 related to credits made to the Special Provision Fund (Royal Decree Law 12/1995 Fund) for the capitalisation of interest accrued in relation to the fund's own remuneration. The figure also includes a provision charge for ICO's liquidity lines with ICO risk (see Note 9.1.2.) amounting to 154,004 thousand euros in 2011 (195,552 thousand euros in 2010) and an allocation to the contingency fund (28,714 thousand euros) and the recovery of the contingency fund for 18,154 thousand euros (charge of 28,714 thousand euros at 31 December 2010).
- (2) Transfers and other movements relate mainly to the Fund to compensate AIE shareholding results, allocations to which are charged to "Income tax expense", amounting to 4,982 thousand euros at 31 December 2011 (5,830 thousand euros at 31 December 2010) and to the reclassification of impairment provisions for AIE shareholdings for 14,870 thousand euros (see Note 13). The amount at 31 December 2010 also includes the increase in the Royal Decree-Law 12/95 Fund for the contribution of the State (11,952 thousand euros).

## 21. VALUATION ADJUSTMENTS

The valuation adjustments balance attributed to the amount of gross and net tax effect is as follows:

			Thousands	of Euros		
		2011			2010	
	Gross	Tax effect (Note 16)	Net	Gross	Tax effect (Note 16)	Net
Available-for-sale financial assets Cash flow hedging	35,497 258,263	(10,649) (77,479)	24,848 180,784	39,404 160,193	(11,821) (48,058)	27,583 112,135
TOTAL	293,760	(88,128)	205,632	199,597	(59,879)	139,718

The balance of this heading relates to the account "Available-for-sale financial assets" and "Valuation adjustments for cash flow hedging" in the accompanying consolidated balance sheets. The first account records the net amount of changes in the fair value of the assets classified as available for sale that, in accordance with Note 2.2.4, must be included as part of the Group's equity. The second account records the net amount of changes in the fair value of the cash flow hedge instruments.

	Thousands of euros		
	2011	2010	
Opening balance	139,718	(191,002)	
Change in fair value of available – for – sale financial assets (Note 8) Cash flow hedges	(2,735) 68,649	(15,567) 346,287	
Closing balance	205,632	139,718	

## 22. OWN FUNDS

The reconciliation of the opening and closing carrying value in 2011 and 2010 of the heading "Equity" in the balance sheets:

		Tho	usands of euro	s	
	Share	Restatement reserves.	Other reserves	Results	Total
Balance as at January 1,2010	2,202,729	29,965	651,953	22,477	2,907,124
Distribution of results Other increases in reserves Result for the year Other movements	- - 148,719	(911)	22,477 911 - 10,763	(22,477) - 29,960 -	- 29,960 159,482
Balance as at December 31,2010	2,351,448	29,054	686,104	29,960	3,096,566
Distribution of results Other increases in reserves Result for the year Other movements	349,389	(910)	29,960 910 - 5,506	(29,960) - 46,592 -	46,592 354,895
Balance as at December 31,2011	2,700,837	28,144	722,480	46,592	3,498,053

Other movements includes mainly the following:

- Contribution of 340,000 thousand euros by charge to budgetary item 15.16.931 M.871 of 2011 General State Budget Law 39/2010, of 22 December, authorized in order to increase the Institute's equity (140,000 thousand euros as of December 31, 2010, 2010 General State Budget Law 26/2009 of 22 December).
- Based on the eleventh additional provision of Law 24/2001, of 27 December, on fiscal, administrative and social measures, the amounts recovered after the cancellation of debt owed by the State with ICO as a result of certain loans and guarantees granted by the former official credit entities and by the Institute. The contribution to Equity in this connection amounted to 9,389 thousand euros in 2011 (8,719 thousand euros in 2010).

As from 1993, minimum equity was regulated by Bank of Spain Circular *5/1993*, of 26 March 1993, that lays down that equity should not be less than the accounting balances of risk assets, net of specific provisions, depreciation/amortization and compensatory balances, weighted and multiplied by the coefficients established in said Circular.

Royal Decree - Law 12/1995 of 28 December 1995, concerning urgent budgetary, tax and financial measures published in the Official State Gazette of 30 December 1995 also laid down that the level of equity of Instituto de Crédito Oficial will be that required at each time under legislation governing Credit Institutes, with the pertinent regulatory exceptions.

The Institute's net computable equity, that does not include profit and amounted to 3,702,169 thousand euros at 31 December 2011, exceeded the amount laid down in Bank of Spain Circular. At 31 December 2010 the Institute's net computable equity amounted to 3.314.375 thousand euros that also exceeded the amount laid down in said Circular (Note 1.7.1).

## 22.1 Reserves in fully or proportionally consolidated companies

Set out below is the breakdown by consolidated company of balances under equity "Equity - Reserves - Accumulated Reserves" in the consolidated balance sheets at 31 December 2011 and 2010, in the part of that balance which has arisen on consolidation, analyzed for fully and proportionally consolidated companies in the consolidated financial statements:

	Thousands of euros		
	2011	2010	
AXIS Participaciones Empresariales, S.A. Instituto de Crédito Oficial	6,225 710,879	6,098 678,721	
	717,104	684,819	

## 22.2 Reserves and exchange differences in entities carried under the equity method

"Equity - Reserves - Reserves in companies carried under the equity method " in the consolidated balance sheets at 31 December 2011 and 2010, in the part of that balance which has arisen on consolidation process, analyzed for each company carried under the equity method in the consolidated financial statements:

	Thousands of euros		
	2011	2010	
COFIDES, Compañía Española de Financiación del Desarrollo, S.A. CERSA, Compañía Española de Reafianzamiento, S.A. Other entities	5,327 49 	3,323 58 (2,096)	
	5,376	1,285	

## 23. TAX SITUATION

The balance sheet at 31 December 2011 and 2010 includes, within the heading "Customer debits" the liability relating to applicable taxes.

The Institute does not pay tax under the tax consolidation regime as the Institute, the Group's Parent entity, was exempt from corporate income tax in the years 1993 through 1996, in accordance with Royal Decree Law 3/1993, of 26 February 1993, on urgent budgetary, tax, financial and employment measures. In accordance with the provisions of Transitional Provision Thirteen of Law 43/1995 (27 December) on corporate income tax, the Institute was exempted from this tax in 1997 and 1998 and became liable to general corporate income tax as from 1999.

The reconciliation of the accounting Institute's profit for 2011 and 2010 to the corporate income tax base is as follows:

	Thousands of euros	
	2011	2010
Book profit before income tax Permanent differences	55,142	41,359
Externalisation of pension commitments Foreign taxes paid	- 1,189	- 1,799
Tax-loss carryforwards attributed to invested companies Monetary adjustment due to the sale of assets	(19,665)	(37,637)
Adjustment to the measurement of derivatives	<u> </u>	-
Temporary differences:	36,666	(35,838)
Due to impairment losses and provision non-deductible	263,251	228,430
Due to the reversal of temporary differences arising in other years	(261,134)	(25,234)
	(883)	203,196
Tax assessment base	35,783	208,717
Gross tax payable (30%)	10,735	62,615
Deductions and allowances	(866) (11,668)	(1,454) (40,729)
Withholdings and interim payments	(11,000)	(40,720)
Tax payable (Note 16)	(1,799)	20,432
Corporate income tax Adjustments for exchange differences	10,134	203
Other adjustments (Note 13 and 20)	4,982	9,908
Corporate income tax	15,116	10,111

There are no tax losses available for offset. During the year the losses allocated of the Economic Interest Groupings in which ICO, the Group's Parent entity, has a differing proportional interest in capital are included (19,665 thousand euros at December 2011 and 37,637 thousand euros at December 2010). Losses are allocated on the basis of the information provided by the entities. It has been decided to allocate these items in the same period in which the balance sheets of the Economic Interest Groupings are closed.

The tax incentive deductions applied in the years 2011 and 2010 in respect of professional training expenses amount to 17 thousand euros and 32 thousand euros respectively. There is an international double tax deduction (taxes borne) amounting to 849 thousand euros and 1,422 thousand euros respectively. There are no deductions pending inclusion in future year tax assessments. There are no commitments entered into pending the completion of in relation to the tax incentives applied.

There are no changes in the methods used to depreciate/ amortize fixed assets owing to exceptional causes.

Taxes and other tax obligations applicable to the Institute since 2007 are open to inspection by the tax authorities.

Due to the possible interpretations of tax legislation that may be afforded to some transactions, basically related to new subject ability to corporate income tax following the full exemption from the same, there could be certain contingent tax liabilities. However, in the opinion of the Institute's tax managers, the possibility of these liabilities crystallizing is remote and in any event, the tax debt that may derive from them would not significantly affect the accompanying financial statements.

### 24. FINANCIAL GUARANTEES AND BALANCES DRAWABLE BY THIRD PARTIES

The headings "Contingent risks" and "Contingent commitments" in the balance sheets record the amounts that the group must pay on behalf of third parties in the event that the obligated parties do not do so, in response to the commitments acquired during the normal course of its business.

This heading breaks down as follows at 31 December 2011 and 2010:

	Thousands of euros	
	2011	2010
Contingent risks		
Guarantees and other sureties	2,501,159	2,869,357
	2,501,159	2,869,357
Contingent commitments		
Balances drawable by third parties: Credit institutions	8,065,971	11,064,259
The Public Administrations sector	167,657	163,590
Other resident sectors	7,395,447	4,748,254
Non-resident sectors	363,976	535,912
	15,993,051	16,512,015
Other commitments	505,645	525,633
	16,498,696	17,037,648

At 31 December 2011 the item titled "Available from third parties - credit entities" includes the total amount formalized in December 2010 by ICO in respect of new ICO 2011 lines of mediation of 8,000 million euros (11,000 million euros at 31 December 2010).

A significant part of these amounts will mature without any payment obligation arising for the Group and therefore the sum of the balances relating to these commitments cannot be considered as an actual future need for financing or liquidity to be granted by third parties to ICO.

The revenues obtained from guarantee instruments (guarantees and other sureties) are recorded under the heading "Commissions received) in the income statement and are calculated by applying the rate established in the relevant contract to the nominal amount of the guarantee.

## 25. INTEREST AND SIMILAR INCOME

Interest and similar yields for 2011 and 2010 are broken down below by source:

	Thousands of euros	
	2011	2010
Bank of Spain and credit institutions	2,662	1,252
Credit institution deposits	1,464,020	840,003
Loans and advances to other debtors	710,207	435,602
Public administrations	73,059	33,954
Resident sectors	637,148	401,648
Debt securities	456,578	172,030
Adjustment of income from accounting hedges	(28,874)	(35,790)
Other interests	11,413	-
Doubtful assets	8,884	6,485
	2,624,890	1,419,582

## 26. INTEREST AND SIMILAR CHARGES

The breakdown of this profit and loss heading during 2011 and 2010 is as follows:

	Thousands of euros	
	2011	2010
Deposits from Central Banks	4,062	3,805
Credit institution deposits	58,125	41,869
Customer funds	533,238	244,948
Deposits represented by marketable securities	2,282,460	1,793,275
Promissory notes (Note 19.5)	7,048	46,905
Other non-convertible securities (Note 19.6)	2,275,412	1,746,370
Adjustment of expenses owing to hedging operations	(687,539)	(1,017,179)
	2,190,346	1,066,718

## 27. RETURN ON EQUITY INSTRUMENTS

All yields obtained in this respect relate to the Equity portfolio and in 2011 and 2010 this item totalled 951 thousand euros and 258 thousand euros, respectively, in the consolidated income statement.

## 28. RESULTS IN COMPANIES CARRIED UNDER THE EQUITY METHOD

All entities results valuated by the equity method registered in this caption in the consolidated income statements amounted losses of 2,909 thousand euros and, 1,863 thousand euros in 2011 and 2010, respectively. Appendix I provide a breakdown of and relevant information on the shareholdings at 31 December 2011 and 2010.

## 29. FEES AND COMMISSIONS INCOME AND EXPENSES

The breakdown of the balance of this consolidated profit and loss account heading is as follows:

	Thousands of euros			
	2011	2010		
Commissions received				
Contingent risks	4,476	4,239		
Availability commissions	18,523	11,758		
Collection and payment services	11	11		
Other commissions	26,627	36,755		
	49,637	52,763		
Commissions paid				
Signature risks	(105)	(122)		
Other commissions	(4,173)	(3,986)		
	(4,278)	(4,108)		
Net commissions for the year	45,359	48,655		

## 30. GAIN OR LOSSES ON FINANCIAL ASSETS AND LIABILITIES

The breakdown of this consolidated profit and loss account heading, based on the origin of its components, is as follows:

	Thousands of euros			
	2011	2010		
Hedging derivatives (Note 7) Derivatives held for trading	(5,220)	35,571 -		
	(5,220)	35,571		

## 31. PERSONNEL EXPENSES

The composition of this consolidated income statement heading is as follows in 2011 and 2010:

	Thousands of euros			
	2011	2010		
Wages and salaries	14,210	14,684		
Staff welfare expenses	3,366	3,063		
Other expenses	1,582	1,474		
	19,158	19,221		

The number of employees at the Group at 31 December 2011 and 2010, by professional category and sex, was as follows:

	Distribution of employees						
	Me	n	Women				
	2011	2010	2011	2010			
Management	6 6		8	7			
Managers and technicians	114	108	142	144			
Administrative staff	10	13	53	56			
Support and sundry staff	1	1	<u> </u>	-			
	131	128	203	207			

The average number of employees at the Group in 2011 and 2010, by professional category and location, was as follows:

	Average distribution of employees							
	Mer	1	Wom	en				
	2011	2010	2011	2010				
Management	6	9	8	7				
Managers and technicians	111	99	143	136				
Administrative staff	12	16	55	60				
Support and sundry staff	1	1		-				
	130	125	206	203				

NOTE: Since the signing of the Fifth Collective Agreement (published in the Official Gazette on October 24<sup>th</sup>, 2008), general service staff is included under the heading of administrative professionals.

## Application of Royal Decree Law 8/2010, of 20 May

Pursuant to Royal Decree-Law 8/2010 of 20 May, adopting extraordinary measures to reduce the budget deficit, and Resolution 606/10-L of the Inter-ministerial Remuneration Committee implementing this Royal Decree, ICO cut employees' wages by 5% in 2010 effective 1 June 2010, although it maintained the "extra salary" paid in June.

## Remuneration and other benefits for the General Council

In 2011 and 2010 the Institute recorded in the Profit and Losses 89 thousand euros and 108 thousand euros, respectively, in respect of remuneration accrued by the members of the Governing Bodies of the companies that form the Group in respect of wages, per diems and other remuneration. These allowances were paid to the Treasury, according to the applicable regulation law (also in 2010).

Fees collected by the Managing Director and other persons exercising similar functions during the years 2011 and 2010 are as follows (thousand euros):

#### Year 2011

	Salaries			
Number of Employees	Fixed	Variable	Other wages	Total
5	484	126	4	614

### Year 2010

	Salaries a	and wages	_		
Number of Employees			Other wages	Total	
5	479	98	4	581	

At December 31, 2011 and 2010 there were no loans granted to the executive members of the Institute's General Council. At December 31, 2010 loans granted under internal regulations on loans to staff, had an outstanding amount of 23,139 thousand euros and the average interest rate was 2.52% (23.548 thousand euros at 31 December 2010, with an average interest rate of 2.52%).

In addition, at that date no pension or life insurance obligations had been acquired with respect to current or former members of the General Council.

## 32. OTHER ADMINISTRATIVE EXPENSES

The breakdown of the consolidated balance of this profit and loss account heading is as follows:

	Thousands of euros			
	2011	2010		
Buildings, installations and materials	1,180	1,233		
Computers	3,002	3,819		
Communications	240	291		
Advertising and publicity	2,755	3,090		
Rates and taxes	1,693	2,311		
Other general administrative expenses	8,598	11,083		
	17,468	21,827		

#### Audit fees

The audit fees for the year are borne by the Contracting Body of the Ministry of Finance in accordance with the Law on Contracts with Public Administrations and complementary legislation and, therefore, are not included in "External services" in the accompanying consolidated income statement.

The amount invoiced by companies under the trademark of Ernst and Young (the auditor of the 2011 and 2010 financial statements) for non-audit services in 2011 was 35 thousand euros (630 thousand in 2010).

## 33. OTHER OPERATING PRODUCTS

The breakdown of the balance of this chapter in the profit and loss account is as follows:

	Thousands of euros			
	2011	2010		
Operating income from investment property Other items	876 2,265	773 1,400		
	3,141	2,173		

"Other items" basically includes the expenses recovered from the return of surpluses and advances made through BBVA asset management.

## 34. FAIR VALUE

As mentioned above, financial assets are recorded on the balance sheet at fair value, except for credit, loans and discounts and equity instruments whose market value cannot be estimated reliably.

In the same way, financial liabilities are recorded on the balance sheet at amortized cost, except those included in the trading portfolio.

Part of the assets recorded under the heading "Credit, loans and discounts" and liabilities recorded under the heading "Financial liabilities at amortized cost" of the balance sheet at December 31, 2011 are variable rate, with annual interest rate revision, so it's fair value as a result of the movements of market interest rates is not significantly different from the one recorded in the balance sheet.

Of the total amount recorded under the heading Credit, loans and discounts and financial liabilities at amortized cost, amounting to 4,869,030 thousand euros and 2,754,026 thousand euros, respectively, at December 31 of 2011 (5.111.110 thousand euros and 3.719 909 thousand euros at December 31, 2010) related to assets and liabilities linked to fixed ratio The fair value of these has been obtained using a weighted average maturity and a weighted average rate through which it has proceeded to calculate fair value using a discount flows. The value calculated for these operations to December 31, 2011 and 2010 is as follows:

	Thousands of euros						
	Book v	alue	Fair v	alue			
	2011	2010	2011	2010			
ASSETS							
Credits, loans and discounts Deposits at credit institutions Customer loans	3,161,874 1,707,156	3,161,874 1,949,236	2,790,109 1,983,494	2,677,220 2,015,558			
LIABILITIES							
Financial liabilities at amortized cost Credit institutions deposits	2,754,026	3,719,909	2,868,155	4,291,906			

## 35. ADDITIONAL EXPLANATION REGARDING THE TRANSLATION OF THE CONSOLIDATED FINANCIAL STATEMENTS INTO ENGLISH

This document is a translation of the consolidated financial statements originally issued in Spanish. In the event of a discrepancy, the Spanish language version prevails.

The accounting policies applied by Instituto de Crédito Oficial and subsidiaries in the consolidated financial statements conform to the International Financial Reporting Standards adopted by the European Union, which may differ from generally accepted accounting principles in other countries.

## INSTITUTO DE CRÉDITO OFICIAL CONSOLIDATED MANAGEMENT REPORT

## Financial backdrop

Four years ago, a financial crisis arose in the US and spread rapidly to the international financial system, pushing the real economy into a crisis from which we have yet to recover. The fallout from this crisis continued to hamper the global economy in general and Europe's economy in particular in 2011. The sovereign debt crisis afflicting certain countries in the Euro Area periphery, downgrades to their credit ratings and all-time high risk premiums for their public debt, not to mention market volatility, were constants on the financial scene and thwarted any attempts of economic recovery throughout the year.

After Greece's and Ireland's bailouts, Portugal was rescued in the spring of 2011. The three countries' bond spreads soared to new highs on several occasions. Italy was the next European country to have its credibility called into question, not just that of its economy, but also of its policies. Italy faced tension in its financial markets and political weakness at the same time, prompting a shift in direction to overcome its economic woes. Spanish debt was also hit, but its spread did not widen nearly as sharply as those of the countries that had been bailed out or Italy's. Nonetheless, it still reached dangerous levels at some points, such as at the end of November, which it closed in on 470bp.

Financial market instability fed through to stock markets, exchange rates and oil prices. In 2011, the euro lost 3% against the dollar, crude prices jumped by around 12.5% and the world's leading stock indices except the Dow Jones retreated –the IBEX slumped 13.5%-.

Whereas financial markets showed no signs of improving or settling down, the real economy did in both Europe and the US in the year's first half. Many thought this heralded the start of a recovery. In fact, some international organisations revised upwards their growth forecasts for the year and the ECB even raised its key interest rate in the spring. However, in the second half, activity began to slow again, especially in Europe, while talk surfaced about the need to restructure Greece's debt and a possible forgiveness.

Spain's economy also saw its recovery truncated: GDP rose 0.4% and 0.2% quarter-on-quarter in the first and second quarters of the year, respectively, but was flat in the third and contracted by 0.3% in the fourth. For the year as a whole, the Spanish economy grew 0.7%. This was a marked improvement in 2010 (GDP contraction of 0.1%), yet the economy flagged clearly in the latter part of the year.

Against this ominous backdrop, Spain's credit market suffered in 2011, with lending falling 4%, the number of loan transactions dwindling constantly and default rising to 7.5%.

## **Operating environment**

Against the financial backdrop described, ICO continued to perform its functions in 2011 as a public bank and state financial agency, subject to its by-law stipulated principles of "financial balance and alignment of means."

In this respect, pursuant to instructions and guidelines issued by economic authorities and resolutions adopted at the General Assembly, ICO continued to arrange new credit facilities to help finance investment and the working capital needs of the self-employed and SMEs as a way of cushioning the negative effects of the economic and financial crisis. These facilities are part of the mediation lines, among which we would highlight the liquidity line for the self-employed and SMEs and the sustainable investment line.

Also noteworthy are the investment line for business growth, entrepreneurs and the internal expansion of Spanish companies and other (direct and indirect) lines of finance for investment in infrastructure, strategic activities, the acquisition of IT equipment by citizens and sustainable tourism. On top of these, other initiatives for smaller amounts were undertaken, targeting, e.g. energy efficiency, cinema, public road transports and victims of disasters.

The total amount of transactions executed in 2011 was 20,920,278 thousand euros. Meanwhile, drawdowns totalled 20,991,867 thousand euros between mediation lines, ICO direct loans, ICO-SGR, Local Corporation Facilities and guarantees extended. Of this amount, 16,043,360 thousand euros were in mediation lines, with the remainder distributed among direct loans to customers.

A highlight of the year was the improvement in the ICO Direct channel for retail finance, begun in June 2010, through which 341,426 thousand euros worth of transactions were executed in 2011. With these loans, the Institute reviews and authorises the transactions, and assumes the entire risk.

Also, in the second half of 2011 a new financial facility for local corporations was started, enabling them to meet their obligations with suppliers. Since it started, 1,028 town councils have availed of this facility, for a total amount of 967,705 thousand euros.

To channel this entire investment, ICO has an annual debt cap established in the State Budget Act. The limit for 2011 was 23,000,000 thousand euros.

With markets up and down and prices spiralling, the necessary funds were raised to meet the primary objective of generating new loans through the various lines. The purpose is to enable ICO to meet maturities in the year and structure the balance so as to either eliminate or minimise the related liquidity, interest rate and foreign currency risks, while ensuring the transparency of its public issues in executing its finance programmes.

ICO based its fundraising activities in 2011 mainly on the issuance of bonds and debentures, and promissory notes, and on loans. Issues were made in seven different currencies, although the bulk was in local currency. The equivalent value in euros of the gross funds raised in the year including long-, medium- and short-term issues and excluding those from the interbank market, customer deposits, etc. was 43,161,000 thousand euros.

Royal Decree-Law 2/2011, of 18 February, to strengthen the financial system, raised the minimum principal capital requirement from 8% to 10% for institutions that rely more heavily on wholesale funding and without securities comprising own funds. For ICO, Additional Provision Forty-nine of State Budget Act 42/2006 stipulates a minimum cash adequacy ratio of 9.5%. At 31 December 2011, the consolidated balance of these funds stood at 3,702,169 thousand euros, 11.70% higher than at 31 December 2010 and equivalent to 3.91% of total assets. The increase in eligible equity in the year was once again due to the measures adopted in Additional Provision Forty-nine of State Budget Act 42/2006, of 28 December 2006, for the 2007 general state budget, allowing ICO's individual capital adequacy to stand at 12.33%. These resources enable ICO to comply with both applicable law and with the Royal Decree-Law applicable to the entire financial system.

## Activity

At 31 December 2011, the balance of loans and receivables; i.e. the outstanding amount of bonds acquired by ICO that replaced the mediation securitised loans at the time (1,026,255 thousand euros at present), unadjusted, stood at 79,722,08 thousand euros. Excluding the credit facilities of the second securitisation fund, this was 10% higher than the year before. The ratios between loans and receivables, and ICO's total assets at year-end 2010 and 2011 were 87% and 84%, respectively.

The balance of loans and receivables by direct transactions with customers, unadjusted and excluding the credit facilities of the second securitisation fund, was 25,853,763 thousand euros, while that of mediation-granted loans (i.e. loans securitised and represented by securitisation bonds) was 48,868,325 thousand euros. These balances were 10% and 9.75% higher, respectively, than in 2010 (the increase in mediation ex-securitisation was 13.2%).

At the end of 2011, funding provided by ICO to credit institutions, excluding the mediation transactions indicated above, totalled 1,837,642 thousand euros, up 68% on the year before. Of this amount, 1,464,804 thousand euros relate to the sum of deposits transferred on the interbank market, 224,212 thousand euros to transactions with BBVA –attributable entirely to refinancing of contributions prior to the privatisation of the former public credit institutions (PCI)- and the remaining 148,626 thousand euros to loans to the resident and non-resident sectors.

At the same time, bonds and commercial paper of financial institutions and government or government-backed debt at 31 December represented an asset of 7,166,579 thousand euros.

ICO borrowings amounted to 81,486,139 thousand euros, equivalent to 86.16% of assets. Of this amount, 84% related to medium- and long-term liabilities and the remaining 16% to short-term liabilities.

Long-term financing comprised 62,959,655 thousand euros of outstanding bonds and debentures, 2,052,271 thousand euros of loans from the European Investment Bank and other liabilities. In all, medium- and long-term financing increased by 21% in 2011. Short-term financing was 46% higher and comprised ECP issues (2,636,320 thousand euros), current accounts (8,302,755 thousand euros) and loans from credit institutions (2,341,300 thousand euros). In addition, there were 4,045,052 thousand euros on the balance sheet related to repayable funds from mediation lines.

Special fixed-rate financing of the State loan to finance demand for credit of the SME liquidity line in 2010, arranged to help SMEs experiencing working capital problems, decreased gradually in the year, to 2,707,750 thousand euros at year-end. This was 21% lower than at 31 December 2010.

## Risk management policy

The Institution's policies for managing credit, liquidity, market and operational risk are described in Note 5.3 to the financial statements.

## Profit of the Institute as parent of the Group

In accordance with Bank of Spain Circular 4/2004, of 22 December and subsequent amendments, net interest income for ICO rose 23.1% in 2011 to 434,382 thousand euros, driven by growth in the liquidity lines -in these, ICO assumes part of the risk, and therefore obtains a higher return- increased financing of local and regional governments –at a high margin- and larger asset volume. In addition, with lending in the financial sector virtually dried up, ICO promoted the ICO Direct channel, which explains part of the increase in income. Meanwhile, the Institute attempted to adapt its fundraising to demand for credit in order to minimise the impact of price volatility on net interest margins. Net interest income represented 0.34% of average total assets (ATA) in 2011, compared to 0.54% in 2010. Gross income in the year increased by 7.94% to 471,586 thousand euros and profit from operations by 34.62% to 57,405 thousand euros.

Total impairment losses (provision charges and other impairment losses) amounted to 374,354 thousand euros. Profit before tax amounted to 55,142 thousand euros and net profit to 40,026 thousand euros in 2011, up 28.09% from 2010. Net profit over ATA (i.e. ROA) was 0.5% in both 2010 and 2011.

## **Research and development costs**

ICO did not carry out any R&D activity in 2011.

## Treasury shares

Not applicable.

## Number of employees

ICO had 320 employees at 31 December 2011, two fewer than in 2010.

## Events after the reporting period

As a result of the international financial crisis and prospects of the crisis continuing in 2012, the Institute, as a state financial agency, will continue to gear its efforts towards implementing countercyclical measures to cushion the impact of the crisis and support the recovery of economic activity and job creation.

In this respect, it will continue to promote loans to self-employed individuals and SMEs through the mediation lines and the ICO Direct programme. ICO will also launch a new facility for regional governments to help them meet the deficit targets set by the central government.

Other significant events after the reporting period at explained in Note 1.8.
